INDUSTRIAL ASSIGNMENT- 7 UI Design using Figma
STUDENT INTERNSHIP AND PLACEMENT MANAGEMENT PORTAL

1. Introduction

User interface design is the seventh phase of the Student Internship and Placement Management Portal project. Industrial Assignments 1 to 6 defined the project, the requirements, the user stories, the SQL queries and the ER diagram of the database. This assignment and the next one convert those documents into screens that students, recruiters, the Placement Officer, Faculty Coordinators and the Administrator can use.

The UI work is divided into two assignments. Industrial Assignment 7 (this document) prepares the design foundation in Figma: the design system, the site map, role-based navigation, user flows, the screen inventory and low-fidelity wireframes of all 18 screens. Industrial Assignment 8 applies the design system to the wireframes to create high-fidelity screens and a clickable prototype.

2. Objectives of the UI Design

- Define a simple and consistent visual language (colours, typography, spacing and components) that is reused on every screen.
- Organise the portal into pages and menus so that every role sees only the features permitted for that role (business rule BR-11).
- Draw the main user flow of each role so that the number of steps for each task is clear before screens are designed.
- Create a screen inventory that covers all 28 tasks (T01 - T28) of the seven epics.
- Prepare wireframes that show the layout, fields, buttons and messages of each screen without colour or decoration.
- Prepare a Figma file structure that can be handed over to the developers of Industrial Assignments 9 to 12.

3. Scope of the UI Design

- Responsive web interface for desktop (1280 px), tablet (768 px) and mobile (375 px) browsers, as stated in non-functional requirements NFR-04 and NFR-10.
- Five user roles (Student, Company Recruiter, Placement Officer, Faculty Coordinator, Administrator) and the Guest who sees only the login and registration pages.
- Eighteen screens (S01 - S18) that cover all seven epics and all 28 tasks.
- Design in Figma only. The coding of the screens in React is done later; the Figma frames act as the reference for that work.
- Out of scope: native mobile applications, dark mode, company logo upload, in-portal tests and video interviews (these are listed as out of scope or future enhancements in Industrial Assignments 1 to 4).

4. Design Principles

Principle	How it is applied in the portal
Role-based clarity	Each role has its own menu and landing page. Menu items that a role may not use are not shown.
Consistency	The same top bar, sidebar, buttons, form fields, tables and status badges are used on every screen.
Visible status	Application, offer, account, verification and opportunity statuses always appear as a coloured badge with a text label.
Prevent errors	Forms show required fields, formats and hints; ineligible applications are explained before submission; destructive actions ask for confirmation.
Clear feedback	Every save, rejection, approval or failed validation shows a message near the action in plain language.
Privacy	Contact details and resumes are shown only to permitted roles; Faculty Coordinators see masked contact details.
Accessibility	Text and background colours meet the WCAG AA contrast ratio, controls have labels, and colour is never the only way to show meaning.
Responsive	The same content works on desktop, tablet and mobile by changing the layout, not the features.

5. Figma Workspace Organisation

One Figma file named SIPMP_UI_Design is used for both Industrial Assignment 7 and Industrial Assignment 8. The file is divided into pages so that each kind of work stays separate.

No.	Figma page	Contents
00	Cover	Project name, version, author, change log and status legend.
01	Design System	Colour, text and effect styles; component library with variants (this assignment).
02	User Flows and Site Map	Flow diagrams for each role and the site map (this assignment).
03	Wireframes - Desktop	Low-fidelity frames S01 - S17 at 1280 x 800 (this assignment).
04	Wireframes - Mobile	Low-fidelity mobile frames S18 at 375 x 812 (this assignment).
05	High-Fidelity Screens	Coloured screens built from the components (Industrial Assignment 8).

No.	Figma page	Contents
06	Prototype	Connected frames, interactions and overlays (Industrial Assignment 8).
07	Hand-off	Specifications and notes for the developers (Industrial Assignment 8).

Naming convention. Frames are named "S05 / Opportunities / Desktop". Components are named "Group / Name / Variant", for example "Button / Primary / Default" and "Badge / Status / Shortlisted". Styles are named "Color / Primary / 600" and "Text / Body / Regular". Auto layout, constraints and variants are used wherever possible so that the frames resize correctly.

6. Design System

6.1 Colour palette

The palette uses one primary blue for actions and navigation, neutral greys for text and surfaces, and five status colours. Each status colour has a text colour and a light tint that are always used together.

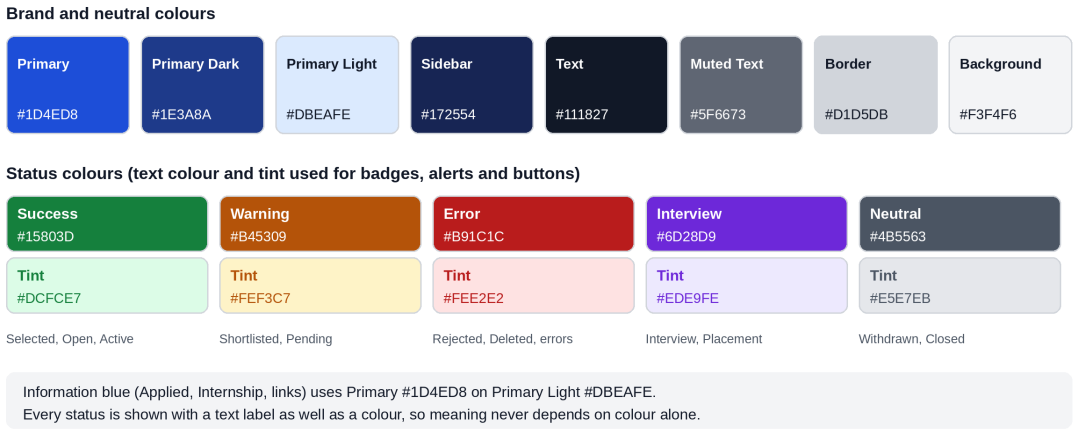

Figure 1: Colour palette of the portal

The contrast ratio of the main colour pairs was calculated with the WCAG formula. A ratio of 4.5 or more passes level AA for normal text.

Colour pair	Ratio	WCAG AA (4.5)
White on Primary #1D4ED8	6.70 : 1	Pass
Text #111827 on White	17.74 : 1	Pass
Muted text #5F6673 on Background #F3F4F6	5.25 : 1	Pass
Warning #B45309 on #FEF3C7	4.51 : 1	Pass
Error #B91C1C on #FEE2E2	5.30 : 1	Pass
Success #15803D on #DCFCE7	4.57 : 1	Pass

Colour pair	Ratio	WCAG AA (4.5)
Interview #6D28D9 on #EDE9FE	5.98 : 1	Pass
Neutral #4B5563 on #E5E7EB	6.10 : 1	Pass
Sidebar text #CBD5E1 on #172554	9.90 : 1	Pass

6.2 Typography

Arial is used for all screens because it is available on every device and Figma. Sizes are for the 1280 px desktop frame.

Text style	Font	Size / weight	Use
Page title	Arial	24 px / Bold	Title at the top of each page.
Section heading	Arial	18 px / Bold	Card titles and sections inside a page.
Body	Arial	16 px / Regular	Paragraphs, table cells and form values.
Label	Arial	14 px / Bold	Field labels, table headings and buttons.
Caption	Arial	12 px / Regular	Hints, helper text and dates.

6.3 Layout grid and spacing

An 8-point spacing scale (4, 8, 12, 16, 24, 32, 48 px) is used for padding and gaps. Cards have a 6 px corner radius and a 1 px border; inputs and buttons have a 4 to 5 px radius.

Device	Frame size	Grid	Margin / gutter	Navigation
Desktop	1280 x 800	12 columns	24 px / 24 px	Left sidebar (about 200 px) and top bar
Tablet	768 x 1024	8 columns	24 px / 16 px	Collapsible sidebar and top bar
Mobile	375 x 812	4 columns	16 px / 16 px	Top bar and bottom tab bar

6.4 Component library

The components below are created once on the Design System page and reused through Figma variants.

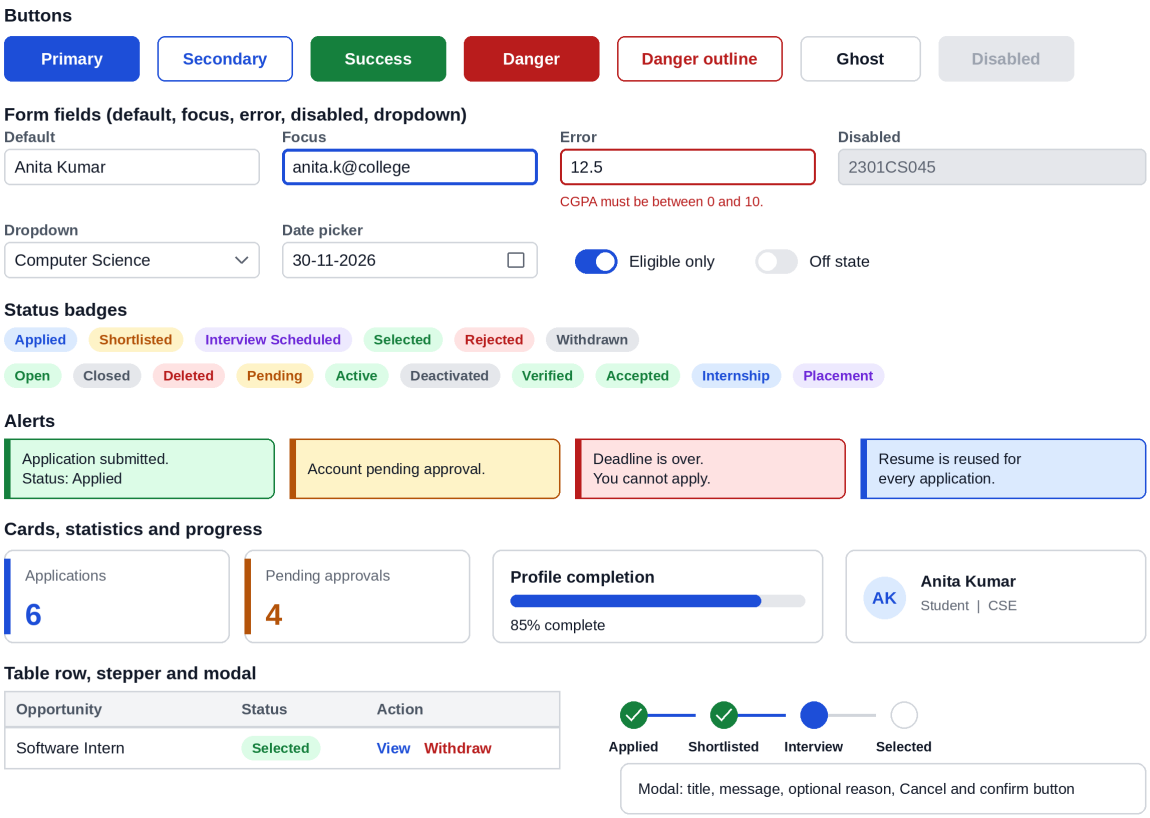

Figure 2: Core components of the design system

Component	Variants and states	Used in
Button	Primary, Secondary, Success, Danger, Danger outline, Ghost; default, hover, pressed, disabled	All forms and dialogs
Text field	Default, focus, filled, error, disabled; with label and hint	S01, S02, S04, S09, S10, S13, S16
Dropdown and date picker	Closed, open, selected, error	S02, S05, S10, S13, S16
Status badge	One variant for each status value (see 6.5)	S03 - S17
Alert	Success, warning, error, information	All screens
Table	Header, row, hover row, empty state, pagination	S05, S07, S11, S12, S14 - S17
Card and stat card	Plain card, card with title, stat card with colour bar	S03, S04, S08, S14, S16
Stepper	Completed, current, upcoming	S07 (status history)
Modal dialog	Confirm, confirm with reason	S11 (close, delete), S07 (withdraw)

Component	Variants and states	Used in
Navigation	Top bar, sidebar item (default, active), bottom tab bar	S03 - S18

6.5 Status colour mapping

Status values are taken from the database design (Industrial Assignments 5 and 6). Each value has a fixed badge colour so that users learn the meaning quickly.

Status group	Values	Badge colours
Application status	Applied, Shortlisted, Interview Scheduled, Selected, Rejected, Withdrawn	Blue, Amber, Purple, Green, Red, Grey
Offer status	Pending, Accepted, Rejected	Amber, Green, Red
Opportunity status	Open, Closed, Deleted	Green, Grey, Red
Account status	Pending, Active, Deactivated, Rejected	Amber, Green, Grey, Red
Verification status	Pending verification, Verified	Amber, Green
Opportunity type	Internship, Placement	Blue, Purple

7. Information Architecture

7.1 Site map

The site map shows the pages available to each role. Every logged-in role also has the top bar with Logout (Task T03), a role dashboard (Task T21) and the search and filter controls (Tasks T25 - T28).

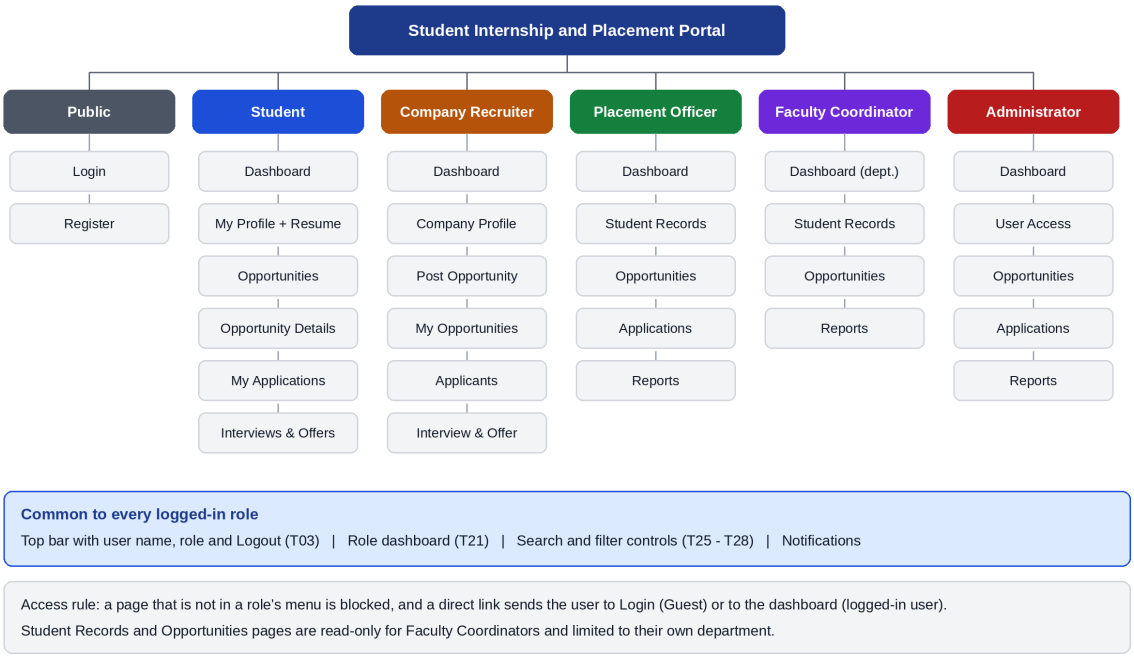

Figure 3: Site map of the portal by role

7.2 Role-based navigation

Role	Sidebar menu	Landing page after login
Guest	Login, Register (no sidebar)	S01 Login
Student	Dashboard, My Profile, Opportunities, My Applications, Interviews and Offers	S03 Student Dashboard
Company Recruiter	Dashboard, Company Profile, Post Opportunity, My Opportunities, Applicants, Interview and Offer	Dashboard; S09 first if no company profile exists
Placement Officer	Dashboard, Student Records, Opportunities, Applications, Reports	S14 Placement Dashboard
Faculty Coordinator	Dashboard, Student Records, Opportunities, Reports (read-only, own department)	Department dashboard (S14 variant)
Administrator	Dashboard, User Access, Opportunities, Applications, Reports	Administrator dashboard (S14 variant)

8. User Flows

A user flow shows the order in which a role performs tasks. The labels below each box give the task number and the screen. Diamonds are decisions made by the system or by another role.

8.1 Student flow

A student registers, logs in, creates the profile, uploads one resume, searches for opportunities and applies. The system checks eligibility before saving the application (Task T13). The student then tracks the status, attends interviews and responds to offers.

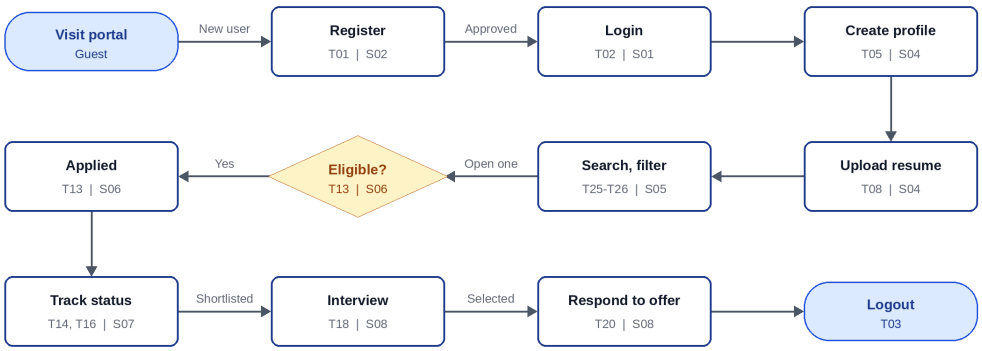

Figure 4: User flow of the Student

8.2 Company Recruiter flow

A recruiter registers and waits for approval by the Placement Officer (business rule BR-03). After login the recruiter creates the company profile, posts opportunities, reviews applicants, updates status, schedules interviews, releases offers to selected students and closes the opportunity.

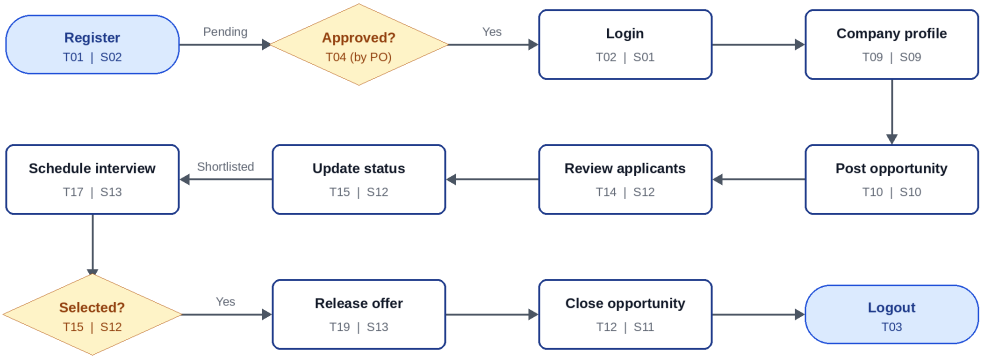

Figure 5: User flow of the Company Recruiter

8.3 Placement Officer flow

The Placement Officer starts from the dashboard, approves recruiters, verifies student details, monitors opportunities and applications, can act on behalf of companies or students in special cases, and generates reports.

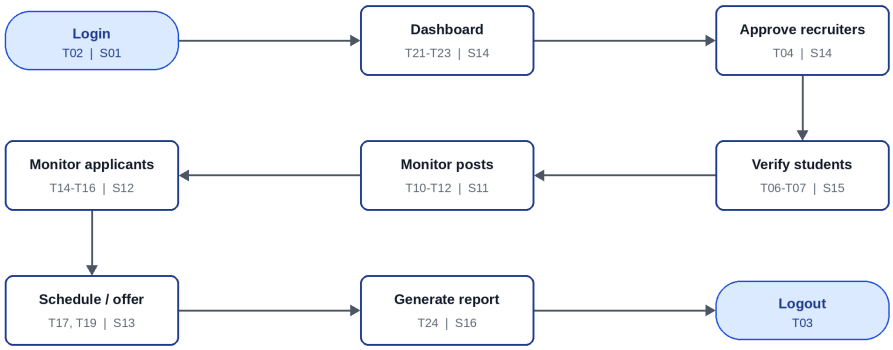

Figure 6: User flow of the Placement Officer

8.4 Administrator flow

The Administrator manages accounts and roles, reviews the access history, restores deleted opportunities and generates reports. The Faculty Coordinator follows a shorter read-only flow: Login, Dashboard, Student Records, Opportunities and Reports for the assigned department, then Logout.

Figure 7: User flow of the Administrator

9. Screen Inventory and Task Mapping

The portal has 18 screens. The table maps each screen to its tasks, roles and the database tables (Industrial Assignment 6) from which its data comes.

ID	Screen	Tasks	Roles	Main tables
S01	Login	T02, T03	All registered roles	users, login_sessions
S02	Register	T01	Guest	users
S03	Student Dashboard	T21	Student	applications, interviews, offers, dashboard_preferences
S04	My Profile and Resume	T05, T06, T07, T08	Student	student_profiles, student_resumes, student_edit_history

ID	Screen	Tasks	Roles	Main tables
S05	Opportunity List with Search and Filter	T25, T26	All logged-in roles	opportunities, companies
S06	Opportunity Details and Apply	T13	Student	opportunities, applications, application_status_history
S07	My Applications	T14, T16, T28	Student	applications, application_status_history
S08	Interviews and Offers	T18, T20	Student	interviews, offers
S09	Company Profile	T09	Company Recruiter (review by Placement Officer, Administrator)	companies
S10	Post / Edit Opportunity	T10, T11	Company Recruiter, Placement Officer	opportunities, opportunity_edit_history
S11	My Opportunities (Close, Delete, Restore)	T11, T12	Company Recruiter, Placement Officer, Administrator	opportunities, opportunity_edit_history, opportunity_deletion_history
S12	Applicants	T06, T14, T15, T28	Company Recruiter, Placement Officer	applications, application_status_history, student_profiles
S13	Interview and Offer	T17, T19	Company Recruiter, Placement Officer	interviews, offers
S14	Placement Officer Dashboard	T04, T21, T22, T23	Placement Officer (variants for Faculty Coordinator, Administrator, Recruiter)	users, user_access_history, opportunities, applications, offers
S15	Student Records	T06, T07, T27	Placement Officer, Faculty Coordinator (read-only), Administrator, Recruiter (own applicants)	student_profiles, users, student_edit_history
S16	Reports	T22, T23, T24	Placement Officer, Faculty Coordinator, Administrator	report_history

ID	Screen	Tasks	Roles	Main tables
S17	User Access	T04	Administrator (recruiter approval by Placement Officer)	users, user_access_history, login_sessions
S18	Mobile Screens (Dashboard and Opportunities)	T21, T25, T26	Student (all roles use the same responsive rules)	as S03 and S05

Coverage of the seven epics is shown below. Every task from T01 to T28 appears on at least one screen.

Epic	Tasks	Screens
EP01 - User Management	T01 - T04	S01, S02, S14, S17 and the top bar
EP02 - Student Profile Management	T05 - T08	S04, S12, S15
EP03 - Company and Opportunity Management	T09 - T12	S09, S10, S11
EP04 - Application Management	T13 - T16	S06, S07, S12
EP05 - Interview and Offer Management	T17 - T20	S08, S13
EP06 - Dashboard and Reports	T21 - T24	S03, S14, S16
EP07 - Search and Filter	T25 - T28	S05, S07, S12, S15

10. Low-Fidelity Wireframes

10.1 Wireframe conventions

- Wireframes use only grey tones so that the discussion stays on layout, content and flow, not on colour.
- Real labels, field names and sample data are used, taken from the input matrices of Industrial Assignments 3 and 4.
- Buttons are shown as grey boxes, text fields as white boxes, and status badges as outlined pills with text.
- The figures are printed at a reduced size; the Figma frames are 1280 x 800 px for desktop and 375 x 812 px for mobile.

10.2 Wireframes of all screens

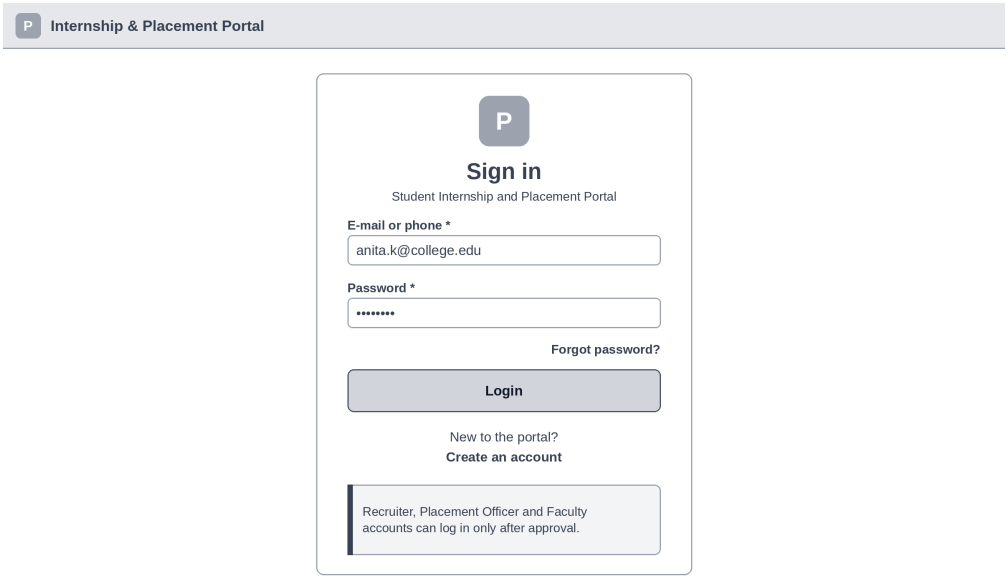

Figure 8: S01 - Login (T02, T03) - wireframe

Key elements: Centered sign-in card with E-mail or phone and Password fields, a Login button, Forgot password and Create an account links, and a note that staff and recruiter accounts need approval. A wrong login shows one generic message without naming the wrong field, as required in Industrial Assignment 3.

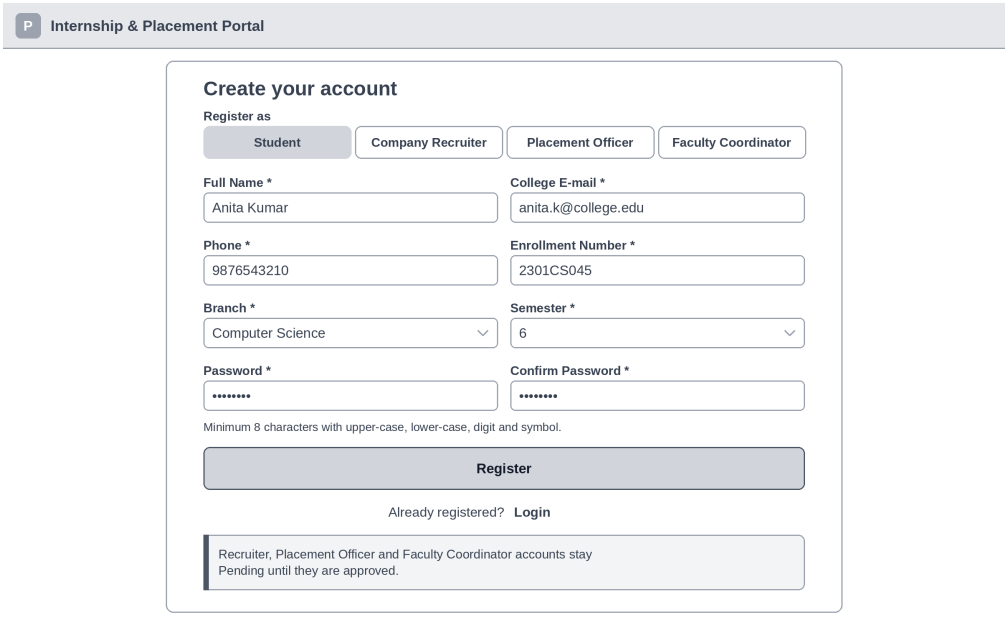

Figure 9: S02 - Register (T01) - wireframe

Key elements: A role selector (Student, Company Recruiter, Placement Officer, Faculty Coordinator) changes the extra fields: enrollment number, branch and semester for students; company name, designation and website for recruiters; employee ID, department and joining date for staff. The Administrator account is created at installation, so it is not offered here.

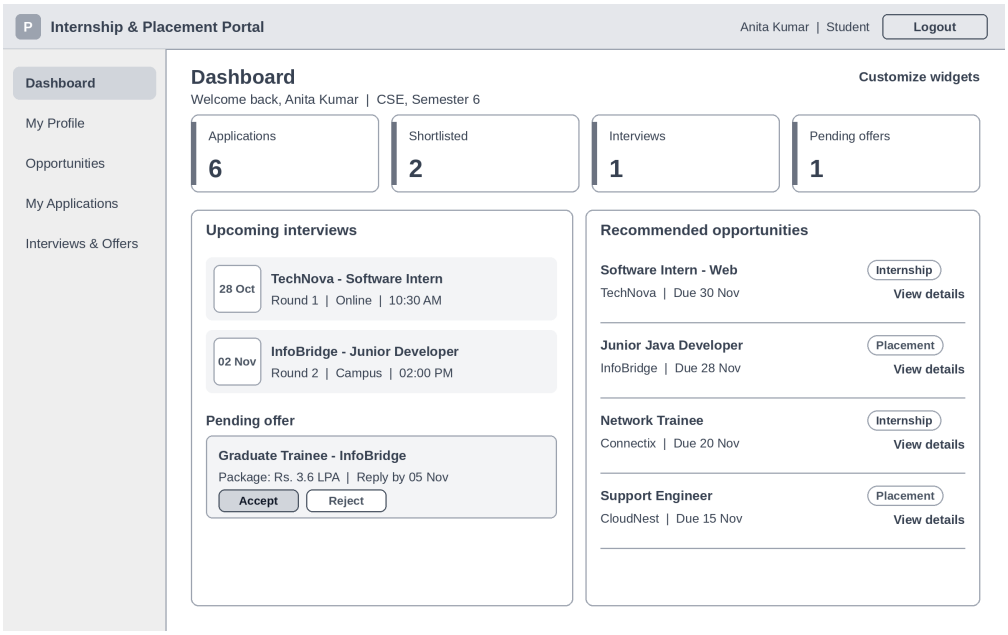

Figure 10: S03 - Student Dashboard (T21) - wireframe

Key elements: Four count cards (applications, shortlisted, interviews, pending offers), an Upcoming interviews list, a Pending offer strip with Accept and Reject, and Recommended opportunities. Customize widgets stores widget visibility and order.

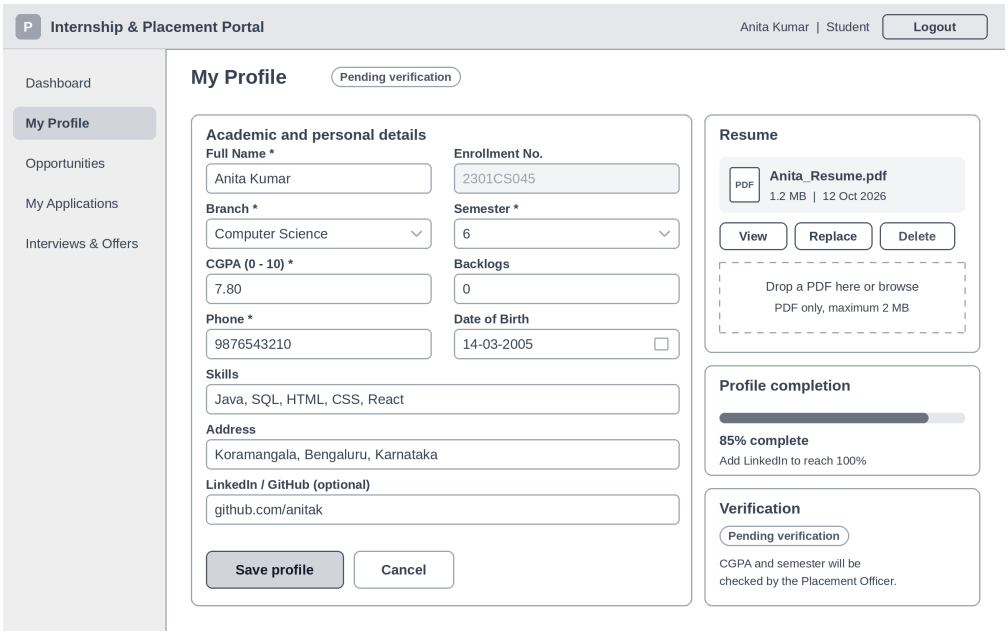

Figure 11: S04 - My Profile and Resume (T05, T06, T07, T08) - wireframe

Key elements: One form for academic and personal details, a Resume card (view, replace, delete, PDF drop zone), a profile completion bar and the verification status. Enrollment number is read-only; changing CGPA or semester returns the profile to pending verification.

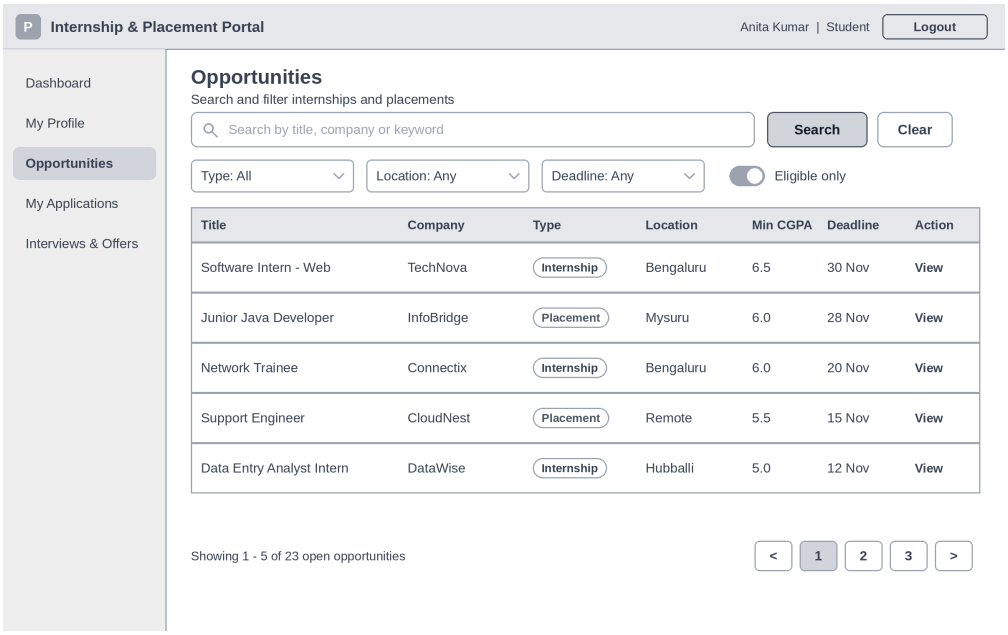

Figure 12: S05 - Opportunity List with Search and Filter (T25, T26) - wireframe

Key elements: Search box, filter drop-downs (type, location, deadline), an Eligible only switch, a results table with a View action and pagination. The same layout serves Task T25 (search) and Task T26 (filter).

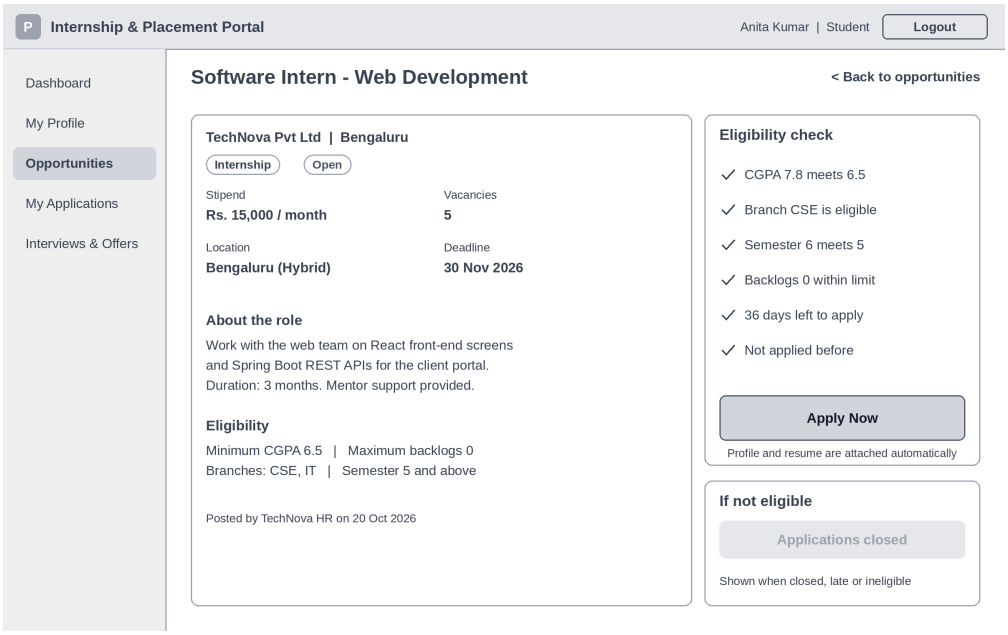

Figure 13: S06 - Opportunity Details and Apply (T13) - wireframe

Key elements: Opportunity facts on the left (company, type, stipend, vacancies, location, deadline, description, eligibility) and an Eligibility check panel on the right with one line per rule. The Apply Now button is disabled with a reason when any rule fails.

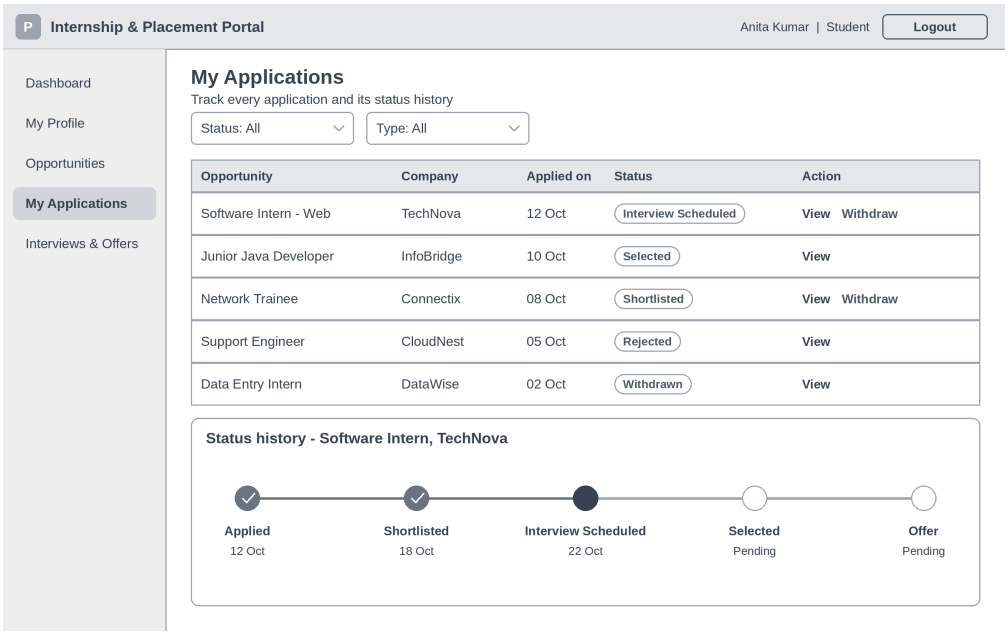

Figure 14: S07 - My Applications (T14, T16, T28) - wireframe

Key elements: Filter row, applications table with status badge, View and Withdraw actions, and a status history stepper for the selected application. Withdraw is shown only for applications that are not finalized.

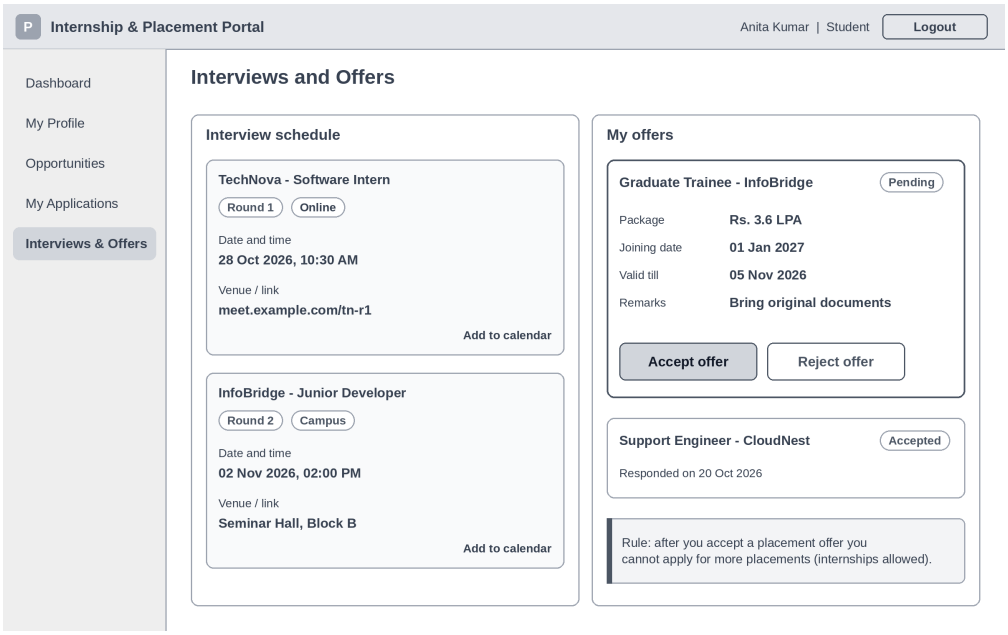

Figure 15: S08 - Interviews and Offers (T18, T20) - wireframe

Key elements: Interview cards (round, mode, date and time, venue or link) on the left and offer cards (package, joining date, validity, remarks, Accept and Reject) on the right, plus the rule about accepted placement offers.

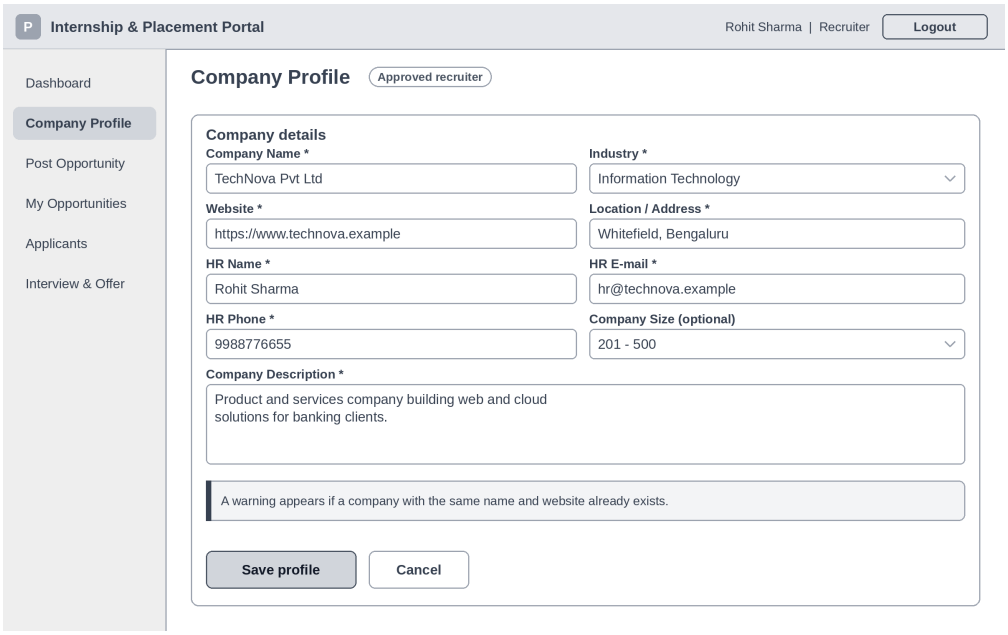

Figure 16: S09 - Company Profile (T09) - wireframe

Key elements: Two-column company form with a description area. A duplicate warning appears on Save when the same company name and website already exist. The status label shows that the recruiter account is approved.

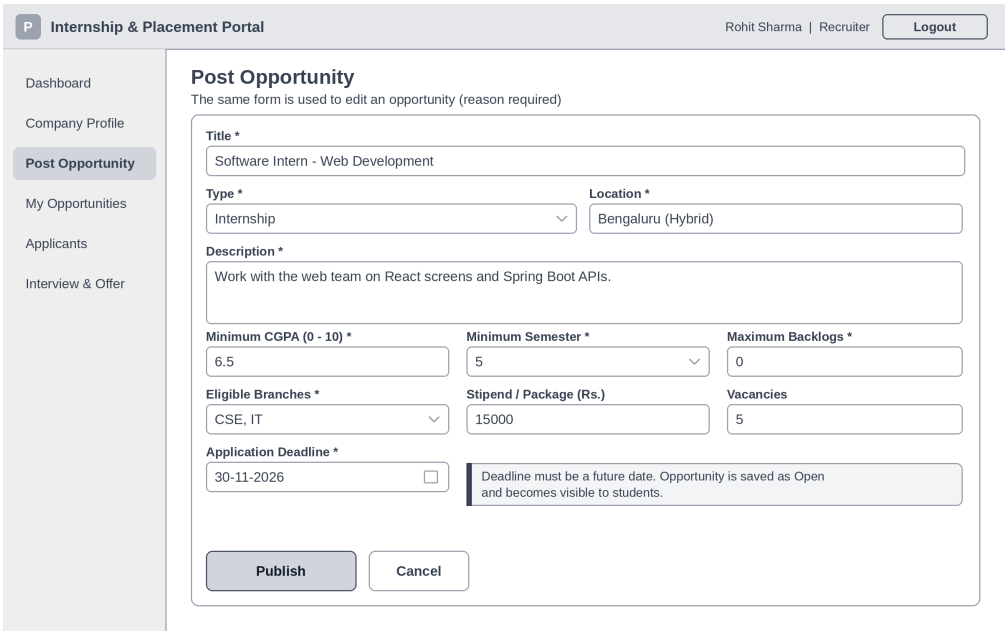

Figure 17: S10 - Post / Edit Opportunity (T10, T11) - wireframe

Key elements: Form for title, type, location, description, eligibility (CGPA, semester, backlogs, branches), stipend or package, vacancies and deadline. The same form is reused for editing, where a reason field is added.

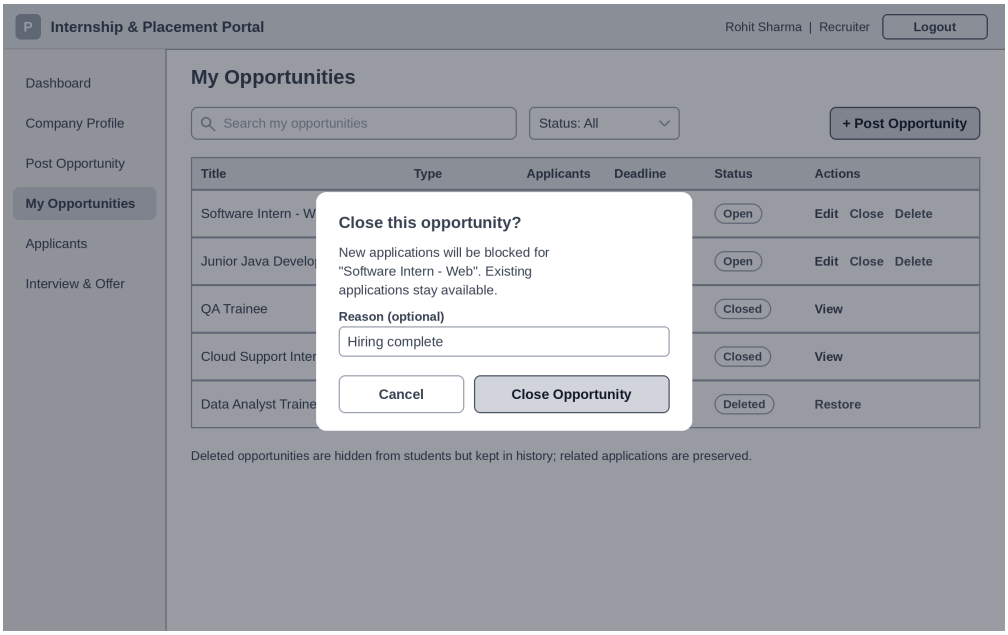

Figure 18: S11 - My Opportunities (Close, Delete, Restore) (T11, T12) - wireframe

Key elements: Searchable table of own opportunities with Edit, Close, Delete and Restore actions. Close and Delete open a confirmation dialog with an optional reason; Delete is blocked when selected applicants exist.

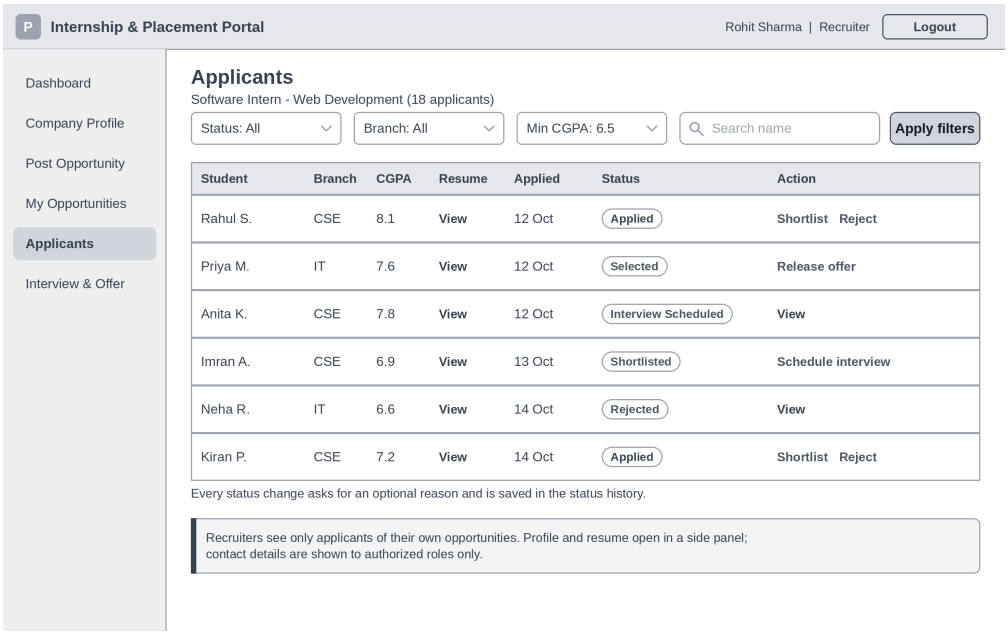

Figure 19: S12 - Applicants (T06, T14, T15, T28) - wireframe

Key elements: Opportunity heading, filters (status, branch, minimum CGPA, name), applicants table with resume link and context actions (Shortlist, Reject, Schedule interview, Release offer) that depend on the current status.

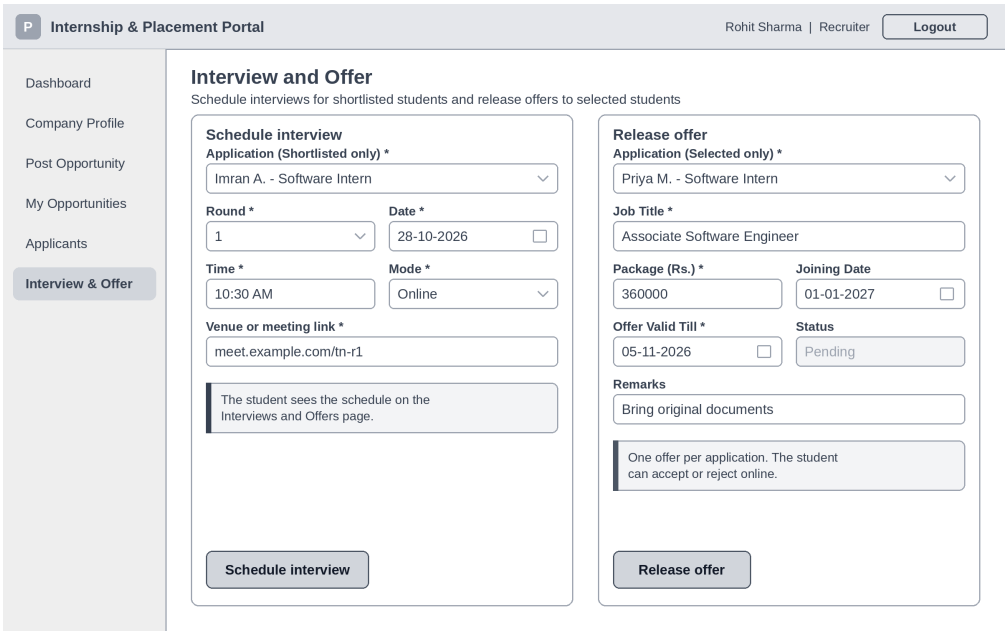

Figure 20: S13 - Interview and Offer (T17, T19) - wireframe

Key elements: Two cards side by side. Schedule interview lists only shortlisted applications; Release offer lists only selected applications. Offer status is fixed to Pending at release.

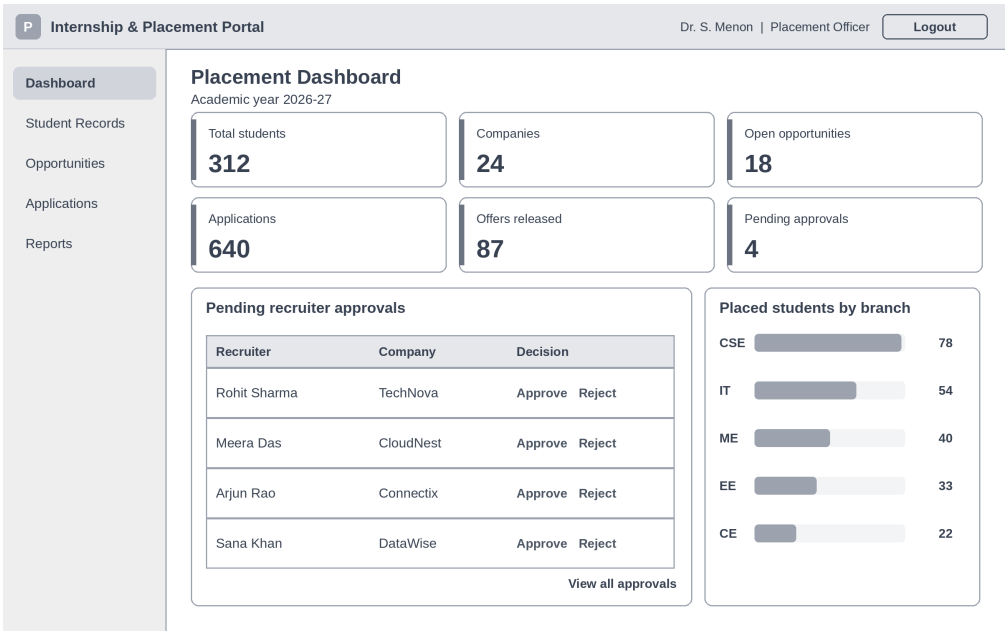

Figure 21: S14 - Placement Officer Dashboard (T04, T21, T22, T23) - wireframe

Key elements: Six count cards, a Pending recruiter approvals table with Approve and Reject, and a branch-wise placed students bar chart. Faculty Coordinator, Administrator and Recruiter dashboards reuse this layout with their own widgets.

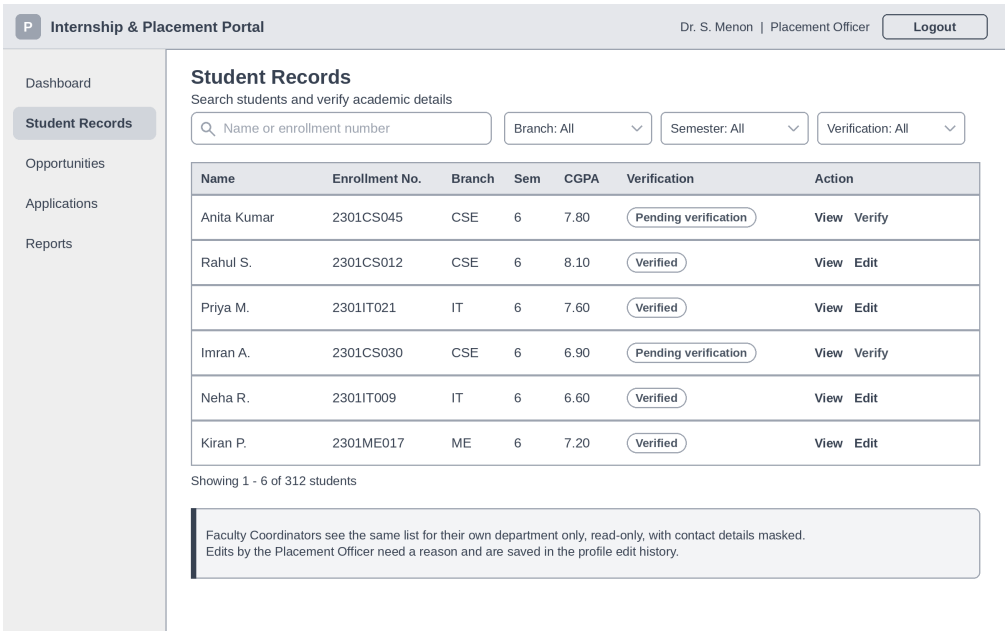

Figure 22: S15 - Student Records (T06, T07, T27) - wireframe

Key elements: Search by name or enrollment number, filters (branch, semester, verification) and a student table with View, Verify and Edit. Faculty Coordinators get the same table limited to their department, read-only and with masked contact details.

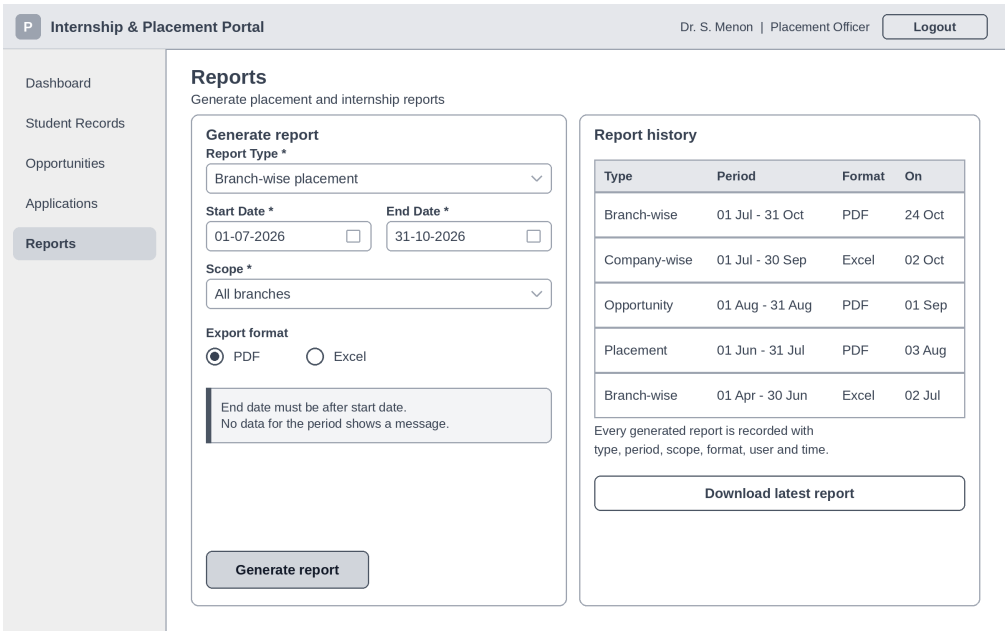

Figure 23: S16 - Reports (T22, T23, T24) - wireframe

Key elements: Left card: report type, period, scope and export format with validation notes. Right card: report history with type, period, format and date. Invalid dates and empty periods show messages.

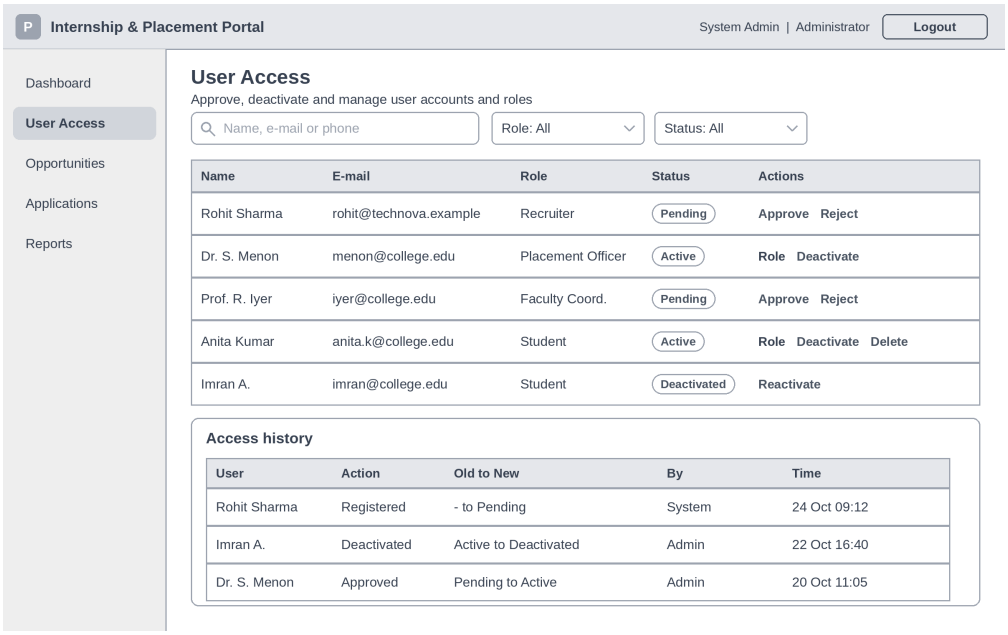

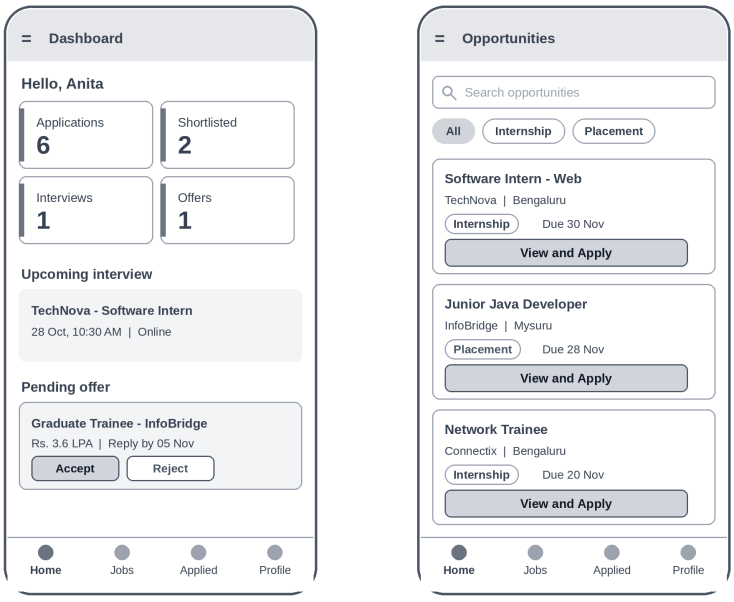

Figure 24: S17 - User Access (T04) - wireframe

Key elements: Searchable account table with role and status filters; actions depend on status (Approve or Reject for Pending, Role, Deactivate and Delete for Active, Reactivate for Deactivated) and an Access history table below.

Mobile frames (375 px wide) use a bottom tab bar and card lists instead of the sidebar and tables

Figure 25: S18 - Mobile Screens (Dashboard and Opportunities) (T21, T25, T26) - wireframe

Key elements: Two 375 px mobile frames: the dashboard as stacked cards and the opportunity list as cards with filter chips. The sidebar becomes a bottom tab bar (Home, Jobs, Applied, Profile).

11. Responsive Behaviour

Element	Desktop (1280 px)	Tablet (768 px)	Mobile (375 px)

Element	Desktop (1280 px)	Tablet (768 px)	Mobile (375 px)
Navigation	Fixed left sidebar	Collapsible sidebar behind a menu icon	Bottom tab bar
Count cards	Four or three in one row	Two in a row	Two in a row, then one
Tables	Full table with all columns	Less important columns hidden	Each row becomes a card
Forms	Two or three columns	Two columns	One column
Filters	In one row above the table	Wrap to two rows	Chips and a filter sheet
Dialogs	Centered modal	Centered modal	Full-width bottom sheet

12. Usability and Accessibility Guidelines

Guideline	Design decision
Colour contrast	Text and badge colours meet the 4.5 : 1 ratio (see Section 6.1). Disabled buttons are the only exception.
Not only colour	Every status badge, validation error and eligibility result has a text label or an icon.
Labels and hints	Each field has a visible label above it; required fields are marked with *; hints explain formats such as password rules.
Touch targets	Buttons and tab bar items are at least 44 x 44 px on mobile frames.
Keyboard use	Tab order follows the visual order; focus state has a 2 px blue outline.
Error messages	Messages state what is wrong and how to correct it, close to the field.
Confirmation	Close, delete, deactivate and withdraw actions open a confirmation dialog.

13. Review Checklist

- All 28 tasks are mapped to at least one screen (Section 9).
- Each screen shows only the actions allowed for its role according to the permission matrices of Industrial Assignments 3 and 4.
- Field names on the forms match the input requirement matrices and the database columns of Industrial Assignment 6.

- Components, styles and variants are created once on the Design System page and reused.
- Wireframes were reviewed against the user flows for missing screens or extra steps.
- The wireframes are the input for the high-fidelity screens and the prototype of Industrial Assignment 8.

14. Conclusion

This assignment created the design foundation of the Student Internship and Placement Management Portal in Figma. It defined the colour, type, spacing and component rules; the site map and role-based navigation; four user flows; and 18 wireframes that cover all seven epics and all 28 tasks. The next assignment, Industrial Assignment 8, uses these foundations to build the high-fidelity screens and the clickable prototype.
