INDUSTRIAL ASSIGNMENT- 8 UI Design using Figma
STUDENT INTERNSHIP AND PLACEMENT MANAGEMENT PORTAL

1. Introduction

Industrial Assignment 7 prepared the design system, the site map, the user flows and the wireframes of the Student Internship and Placement Management Portal. This assignment is the second part of the UI design in Figma. It applies the design system to the wireframes to create high-fidelity screens, defines the messages and states of the interface, and connects the screens into a clickable prototype that can be tested before the backend is coded.

The high-fidelity screens also show which database column each form field is stored in (Industrial Assignment 6), so that the developers of Industrial Assignments 10 and 11 can build the Spring Boot entities and APIs directly from the design.

2. Objectives

- Convert the 18 wireframes into coloured, high-fidelity screens that use only the components, colours and text styles of the design system.
- Show the states of each screen: default, filled, error, empty, disabled and confirmation.
- Map every form field to the database table and column and state its validation rule.
- Define clear messages for validation errors and business rules from Industrial Assignments 2 to 4.
- Build a prototype that follows the main flows of the Student, Company Recruiter, Placement Officer and Administrator.
- Trace each of the 28 tasks to its screens and to a suggested API for the backend assignments.

3. From Wireframe to High-Fidelity Screen

Step	Activity	Figma feature used
1	Copy each wireframe frame to the page "05 High-Fidelity Screens".	Frame duplication, Sections
2	Replace grey boxes with components from the Design System page.	Component instances and variants
3	Apply colour and text styles instead of fixed values.	Colour styles, text styles
4	Add realistic sample data taken from the project context (students, companies, dates).	Text properties, component properties
5	Create the extra states: error, empty, disabled, modal and success.	Variants, overlays
6	Make frames resize correctly for tablet and mobile.	Auto layout, constraints, layout grids
7	Connect frames and add interactions.	Prototype tab

Step	Activity	Figma feature used
8	Check contrast, names and structure; prepare the hand-off.	Preview, Dev Mode, layer naming

4. Design Tokens Applied

The tokens below were created as Figma styles on the Design System page and are used by all high-fidelity screens.

Token (Figma style name)	Value	Used for
Color / Primary / 600	#1D4ED8	Primary buttons, links, active menu item, selected tab
Color / Primary / 900	#1E3A8A	Top bar
Color / Primary / 50	#DBEAFE	Information alert, Applied and Internship badges
Color / Sidebar	#172554	Left navigation background
Color / Text / Default	#111827	Body text and headings
Color / Text / Muted	#5F6673	Hints, captions and sub-titles
Color / Border	#D1D5DB	Card, input and table borders
Color / Surface / Page	#F3F4F6	Page background
Color / Status / Success, Warning, Error, Interview, Neutral	#15803D, #B45309, #B91C1C, #6D28D9, #4B5563	Badge text, alert bars and action links (with matching tints)
Effect / Modal shadow	X 0, Y 8, Blur 24, 20% #111827	Confirmation dialogs
Effect / Focus ring	2 px #1D4ED8	Keyboard focus on inputs and buttons
Radius	6 px card, 5 px button, 4 px input, full for badge	All components

5. High-Fidelity Screens

The screens are shown at a reduced size for printing. In Figma they are 1280 x 800 px (desktop) and 375 x 812 px (mobile). Sample names and dates are only examples.

5.1 Access and Student screens (S01 - S08)

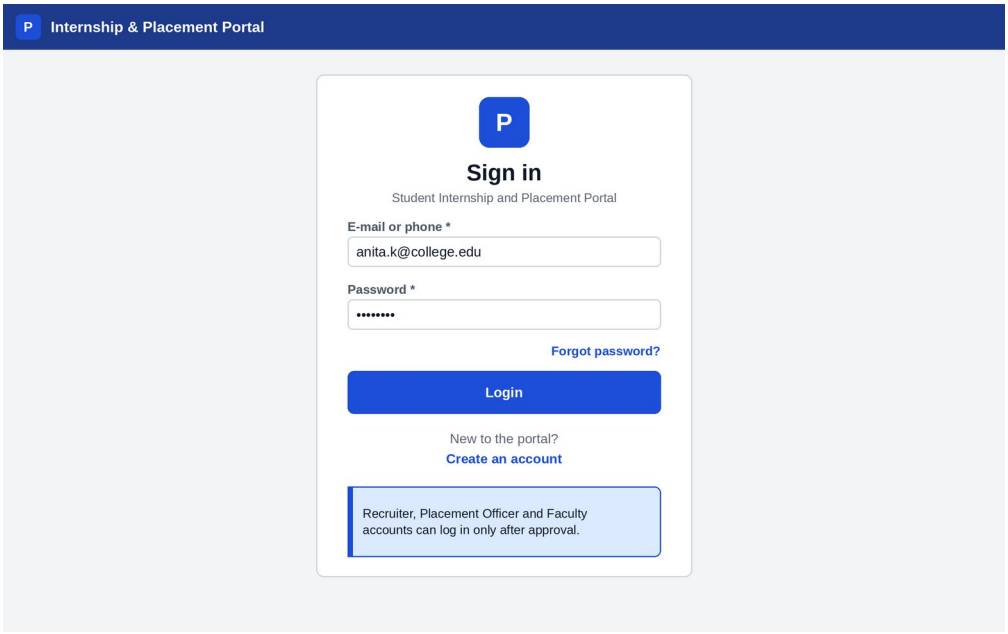

Figure 1: S01 - Login (T02, T03) - high-fidelity screen

Design notes: The Login button uses the Primary colour and the notice uses the information tint. Error, locked, pending, rejected and deactivated states reuse the Alert component above the form. The focus ring is 2 px Primary.

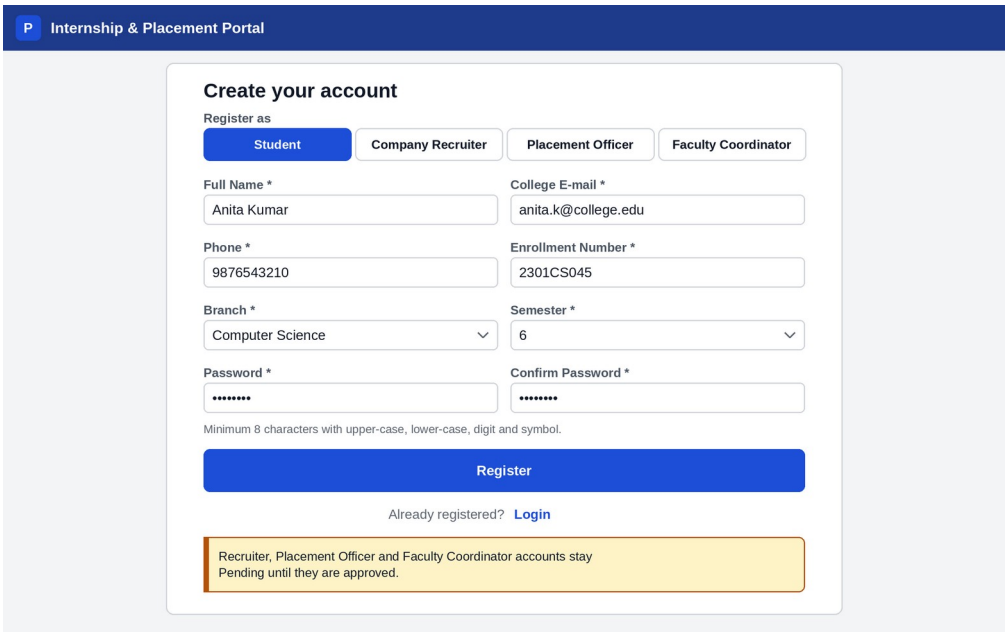

Figure 2: S02 - Register (T01) - high-fidelity screen

Design notes: The selected role segment uses the Primary fill. Fields for the other roles are variants of the same form frame. Field errors appear in red below the field; the amber alert explains that staff and recruiter accounts stay pending until approved (BR-03).

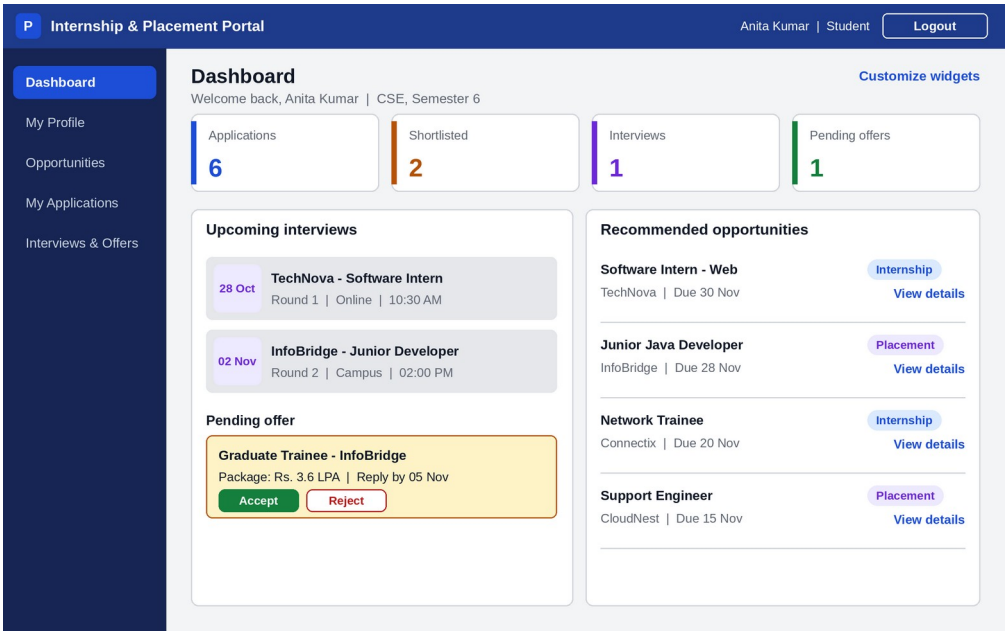

Figure 3: S03 - Student Dashboard (T21) - high-fidelity screen

Design notes: Count cards have a coloured left bar that matches the status colours. The pending offer strip uses the warning tint to attract attention; Accept uses the Success button and Reject uses the Danger outline button.

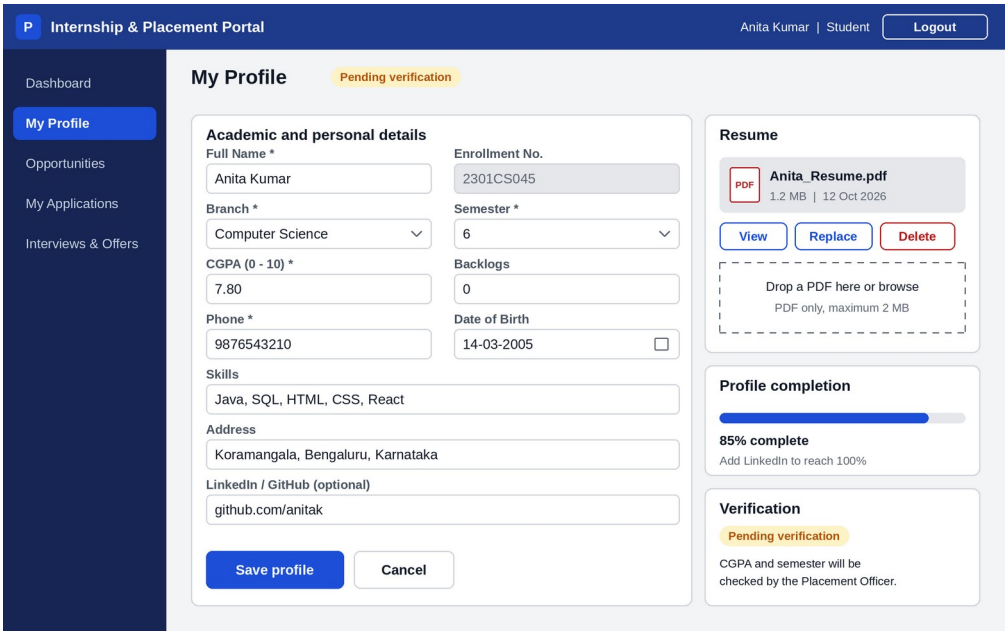

Figure 4: S04 - My Profile and Resume (T05, T06, T07, T08) - high-fidelity screen

Design notes: The Pending verification badge is amber. Enrollment number is a disabled field with grey fill. The resume card shows a red PDF icon and a dashed drop zone that turns blue when a file is dragged over it. Delete is a Danger outline button.

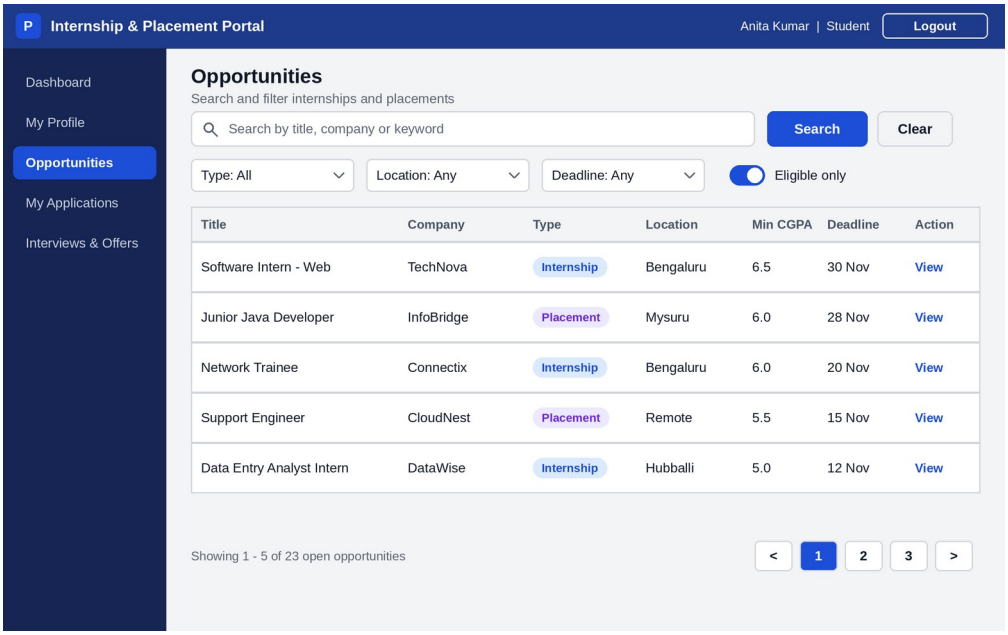

Figure 5: S05 - Opportunity List with Search and Filter (T25, T26) - high-fidelity screen

Design notes: Internship and Placement badges are blue and purple. Eligible only is a toggle (on = Primary). Table rows have a hover state and the active page number uses the Primary fill.

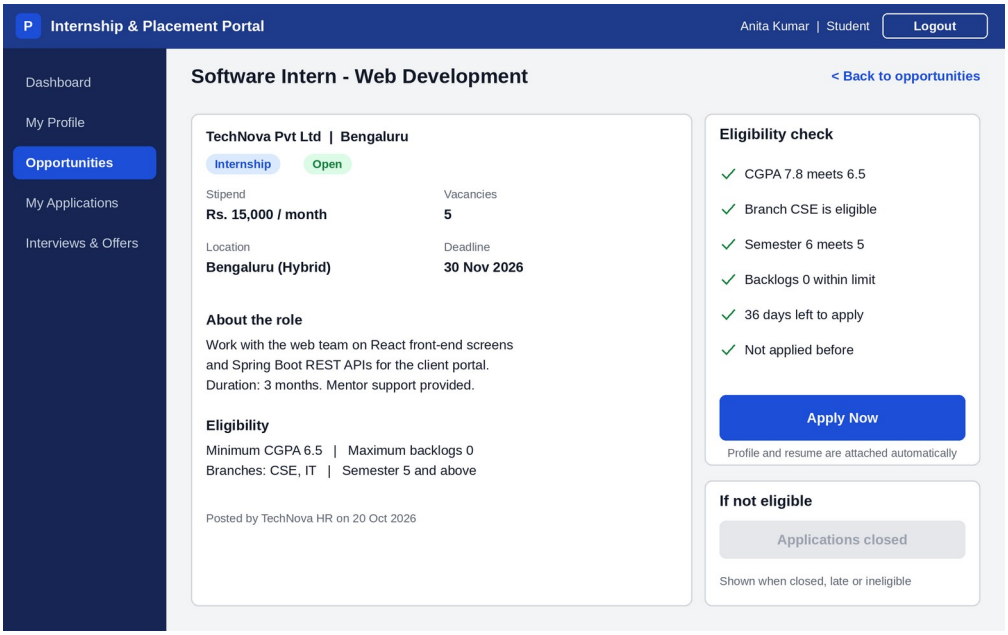

Figure 6: S06 - Opportunity Details and Apply (T13) - high-fidelity screen

Design notes: A green tick marks each satisfied rule. A failed rule shows a red cross with the reason, and Apply Now switches to the disabled variant shown in the second card. This variant is used in the prototype for the ineligible scenario.

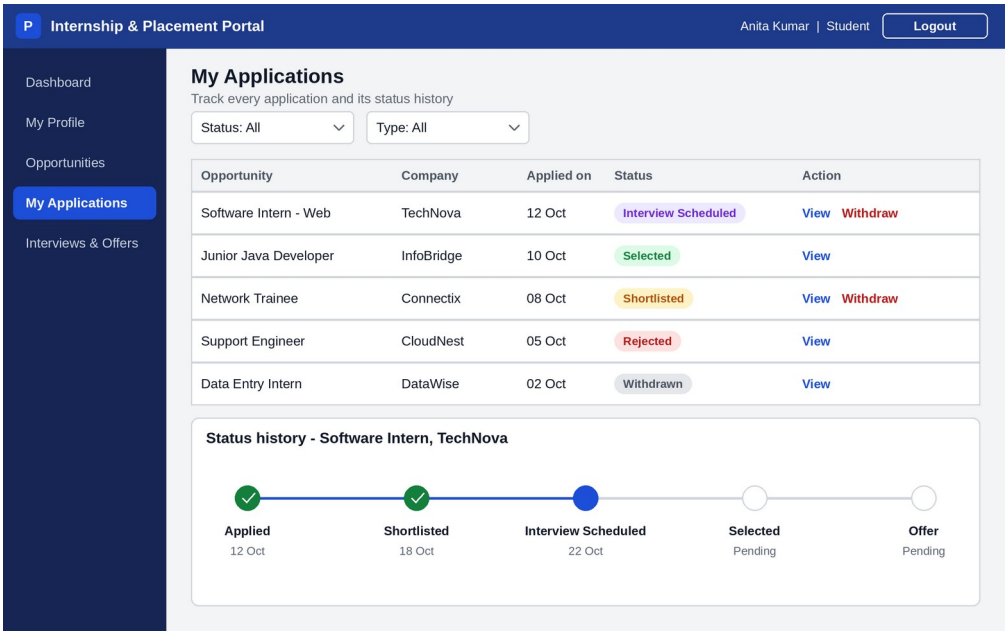

Figure 7: S07 - My Applications (T14, T16, T28) - high-fidelity screen

Design notes: Status badges follow the colour mapping of Industrial Assignment 7. Withdraw is a red text action that opens a confirmation dialog. In the stepper, completed steps are green, the current step is blue and upcoming steps are hollow circles.

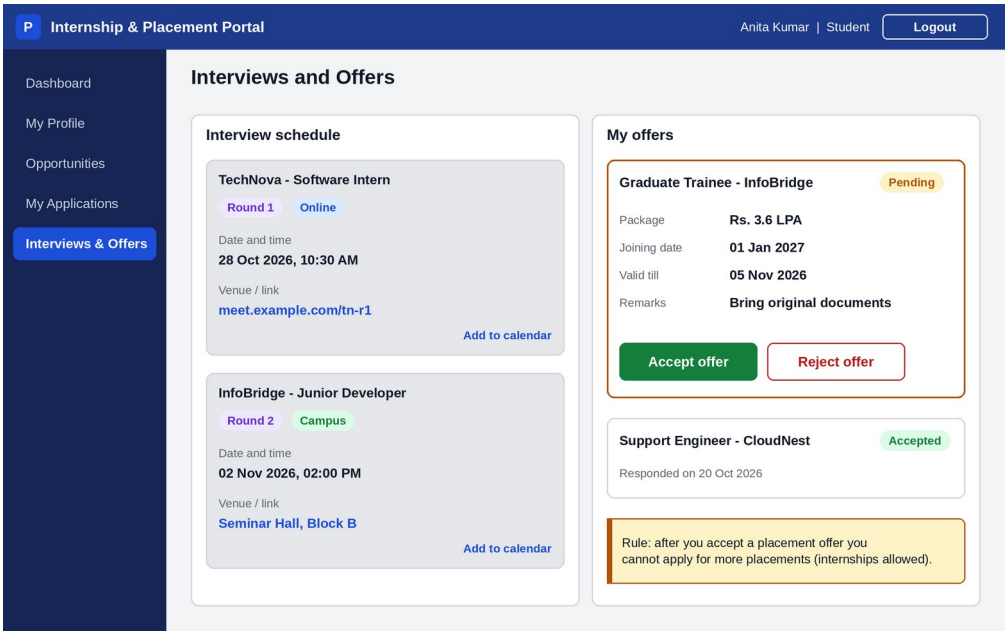

Figure 8: S08 - Interviews and Offers (T18, T20) - high-fidelity screen

Design notes: Interview cards use a grey surface; mode badges are blue (Online) or green (Campus). The pending offer card has an amber border and changes to the Accepted variant with a green badge after the student accepts.

5.2 Company Recruiter screens (S09 - S13)

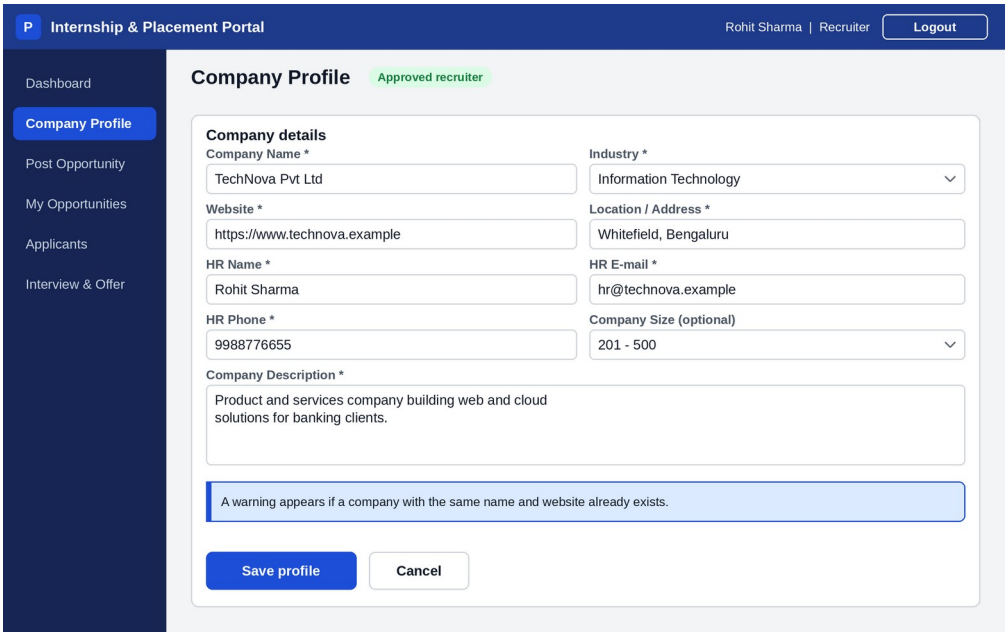

Figure 9: S09 - Company Profile (T09) - high-fidelity screen

Design notes: The Approved recruiter badge is green. Required fields are marked with *. The information alert explains the duplicate check on Save. Save is the Primary button and Cancel is the Ghost button.

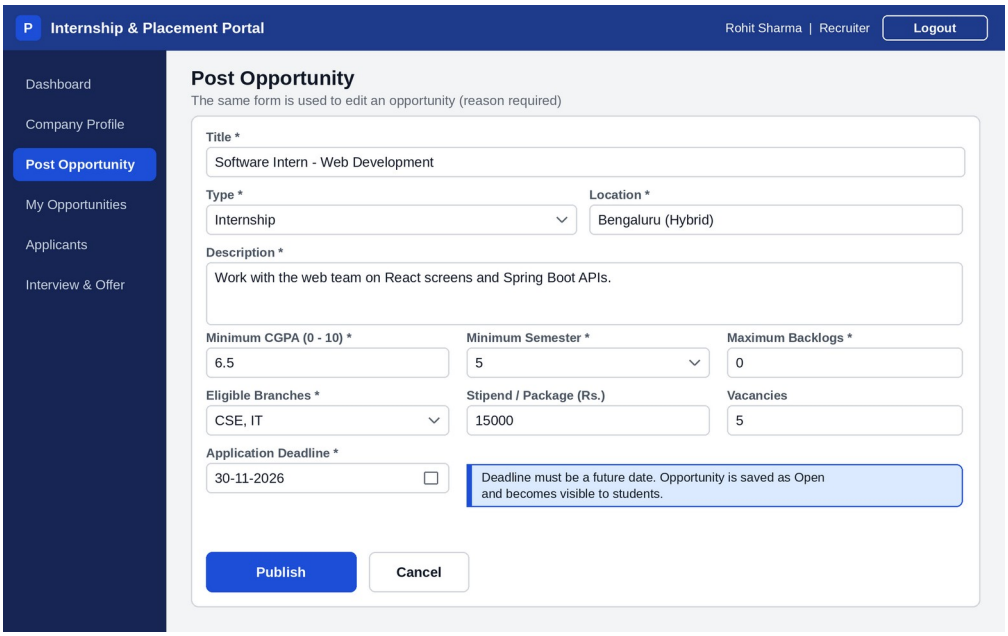

Figure 10: S10 - Post / Edit Opportunity (T10, T11) - high-fidelity screen

Design notes: Edit mode uses the same frame with a Reason field added above the buttons. Invalid CGPA, a past deadline or an empty mandatory field turns the field border red and shows the message below it.

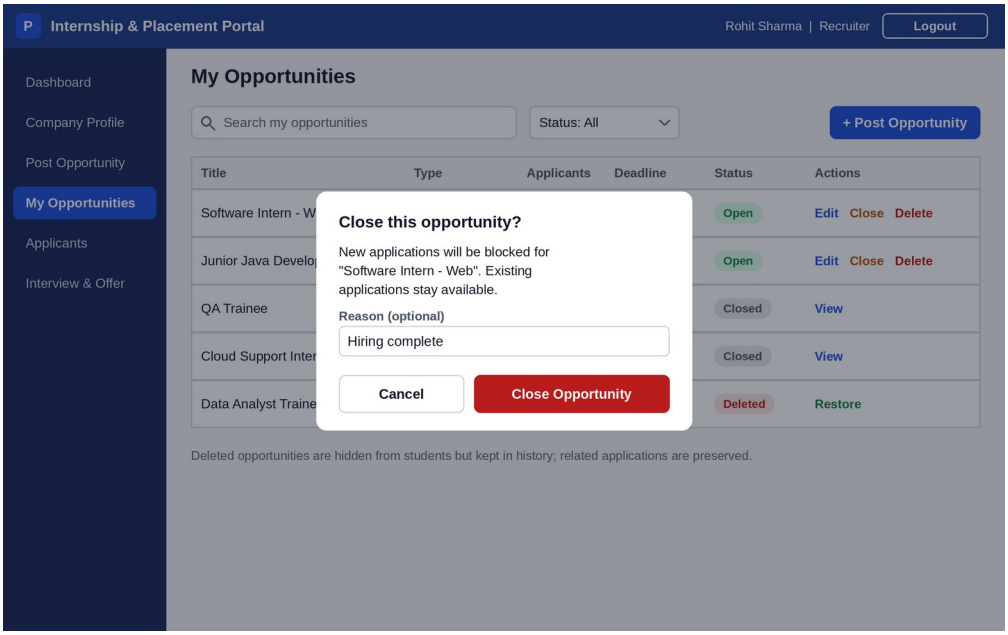

Figure 11: S11 - My Opportunities (Close, Delete, Restore) (T11, T12) - high-fidelity screen

Design notes: The overlay uses a dark scrim; the dialog has a Danger button for the destructive action and a Ghost Cancel button. Deleted rows show a red badge and a green Restore action.

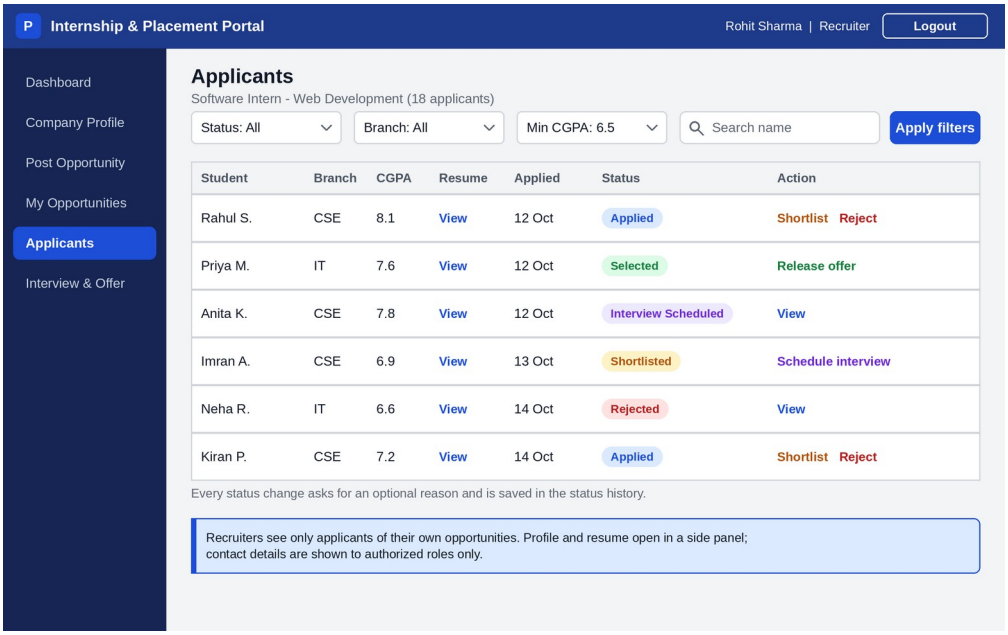

Figure 12: S12 - Applicants (T06, T14, T15, T28) - high-fidelity screen

Design notes: Row actions depend on status: Shortlist (amber) and Reject (red) for Applied, Schedule interview (purple) for Shortlisted, and Release offer (green) for Selected. View under Resume opens a side panel.

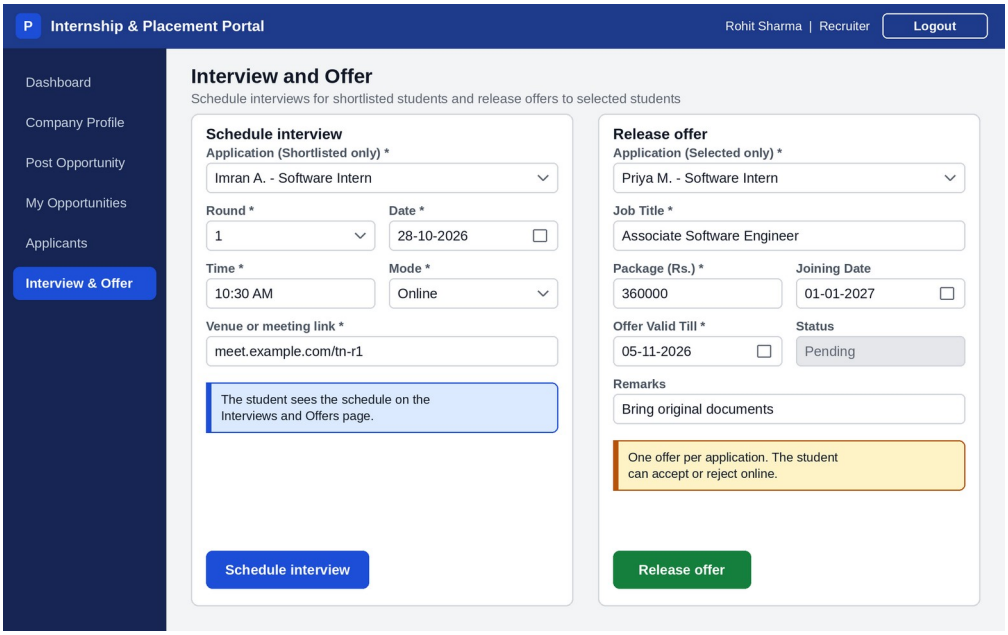

Figure 13: S13 - Interview and Offer (T17, T19) - high-fidelity screen

Design notes: The offer Status field is disabled and fixed to Pending. The information and warning alerts explain the rules of Industrial Assignment 2 (BR-08). Release offer uses the Success button.

5.3 Placement Officer, Faculty Coordinator and Administrator screens (S14 - S17)

The Faculty Coordinator uses S14, S15 and S16 in a read-only variant limited to the assigned department. The Recruiter, Faculty Coordinator and Administrator dashboards use the layout of S14 with their own count cards.

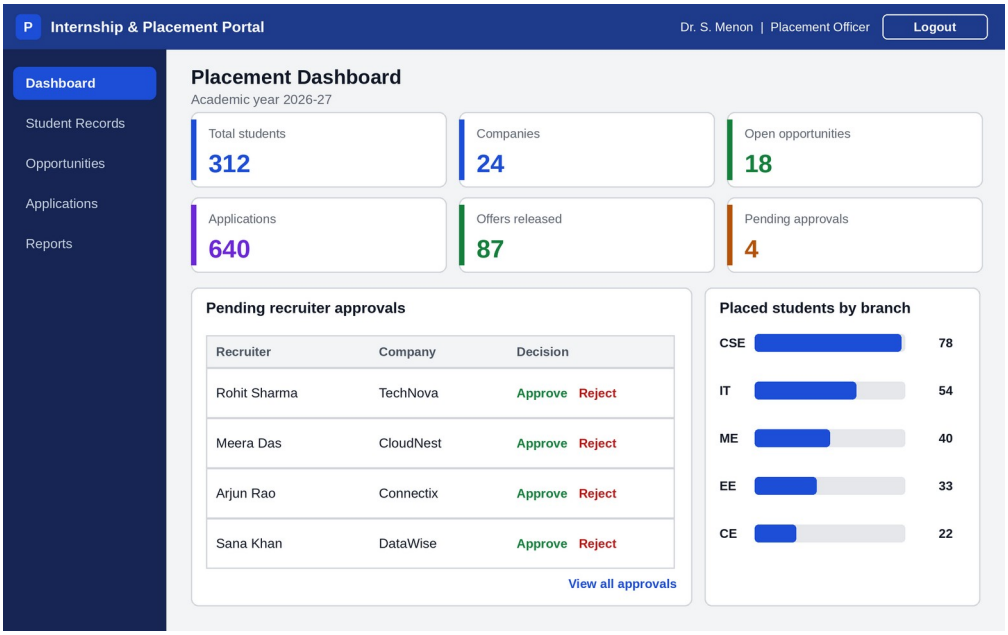

Figure 14: S14 - Placement Officer Dashboard (T04, T21, T22, T23) - high-fidelity screen

Design notes: The Pending approvals card uses the warning colour so that it stands out. Chart bars use Primary. Approve and Reject are text actions in green and red.

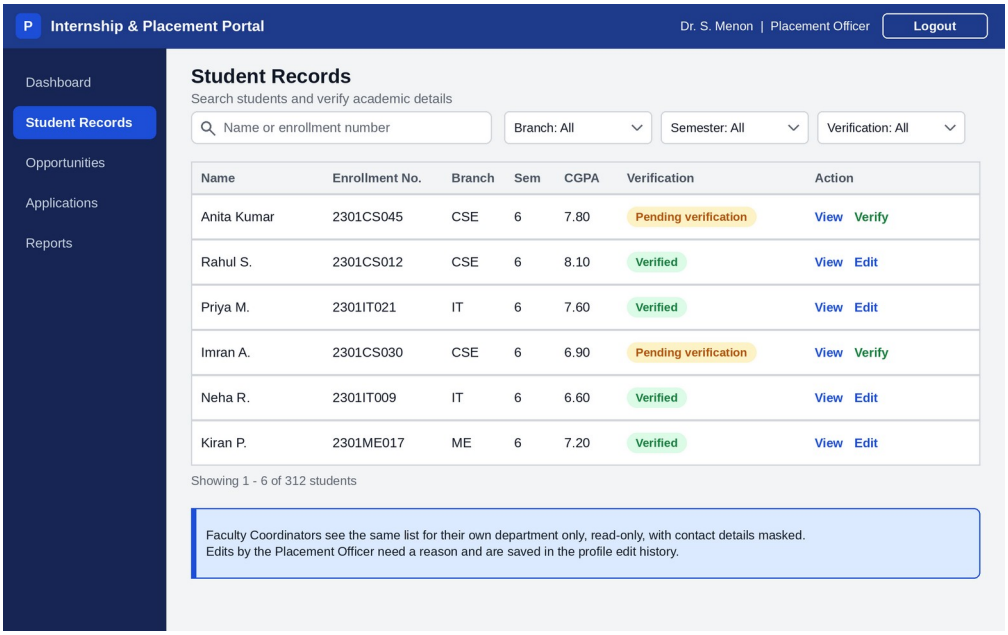

Figure 15: S15 - Student Records (T06, T07, T27) - high-fidelity screen

Design notes: Verification badges are amber or green. For Faculty Coordinators the Action column is removed and contact details are masked; both are variants of the same table component.

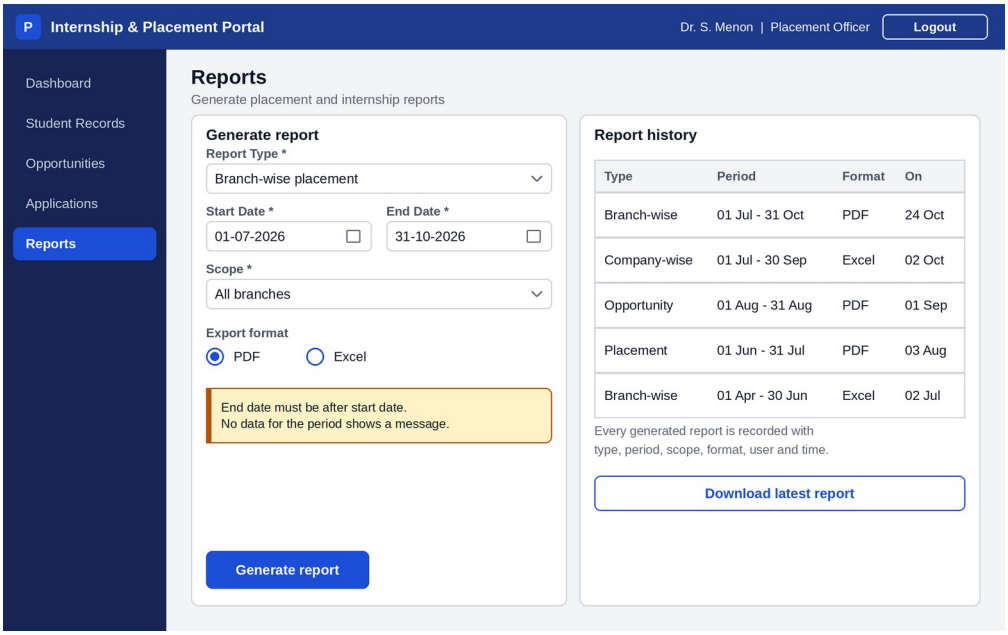

Figure 16: S16 - Reports (T22, T23, T24) - high-fidelity screen

Design notes: PDF and Excel are radio buttons. The amber alert lists the validation rules. Generate report is a Primary button and Download latest report is a Secondary button.

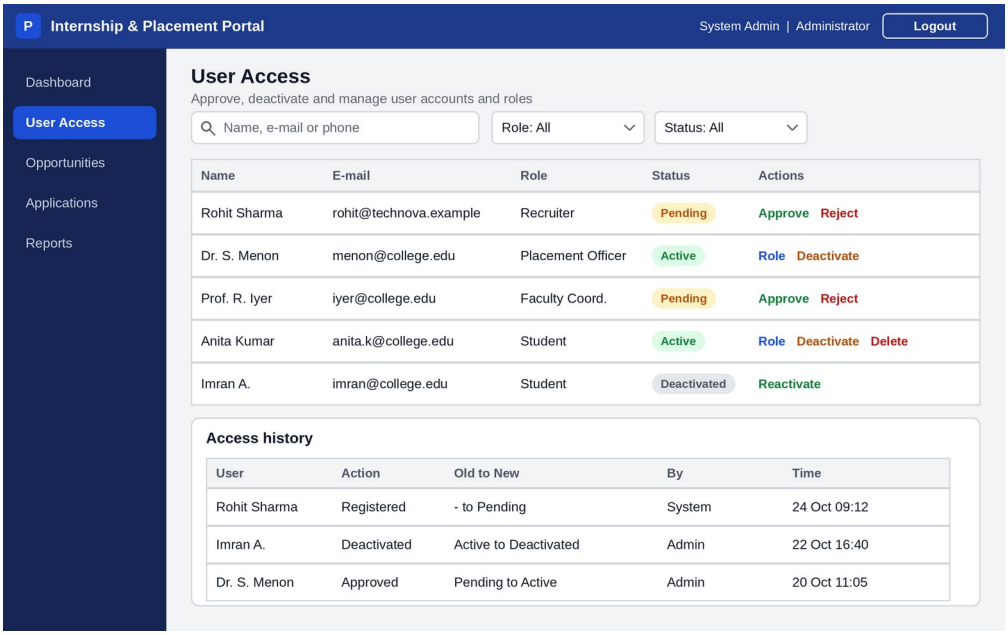

Figure 17: S17 - User Access (T04) - high-fidelity screen

Design notes: Row actions are coloured by meaning: green for approval and reactivation, amber for deactivation, red for rejection and deletion, blue for role change. Destructive actions open the confirmation dialog.

5.4 Mobile screens (S18)

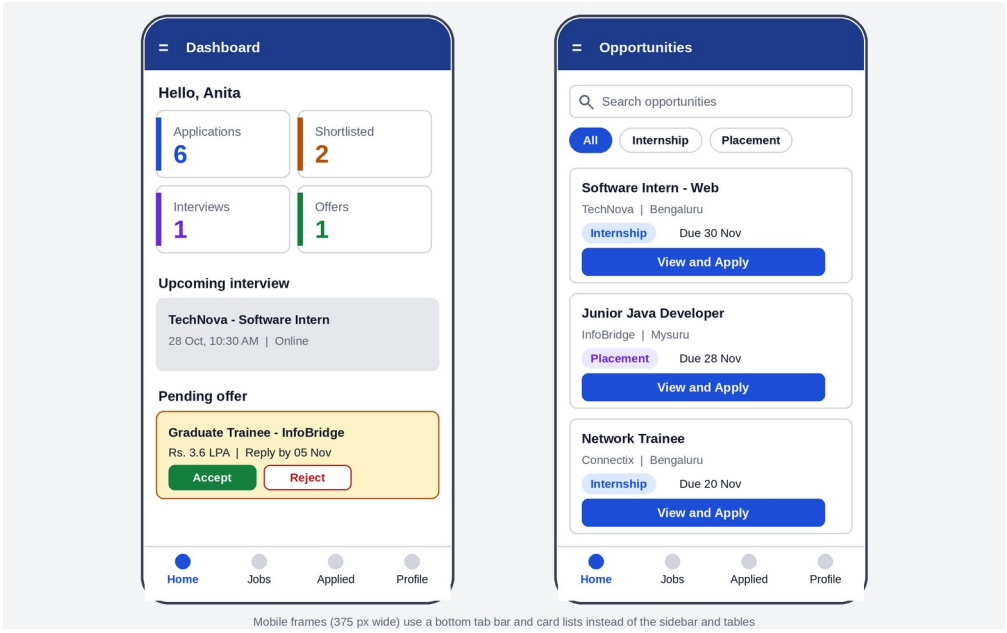

Figure 18: S18 - Mobile Screens (Dashboard and Opportunities) (T21, T25, T26) - high-fidelity screen

Design notes: The mobile frames reuse the same components at 375 px: count cards in a 2 x 2 grid, opportunity cards instead of table rows, filter chips and a bottom tab bar with the active tab in Primary.

6. Form Fields and Database Mapping

Each form field is linked to a table and column of the database designed in Industrial Assignments 5 and 6. System values such as status, timestamps and the user who performed the action are set by the backend and are not shown as inputs.

6.1 Registration form (S02, Task T01)

Field on screen	Table.column	Validation rule
Register as (role)	users.role	One of the four public roles
Full Name	users.full_name	Required
College E-mail	users.email	Required, valid format, unique
Phone	users.phone	Required, valid format, unique
Enrollment Number (student)	users.enrollment_no	Required for students, unique
Branch, Semester (student)	users.branch, users.semester	Required for students
Company Name, Website (recruiter)	users.company_name, users.company_website	Required; website format checked
Employee ID, Department, Designation, Joining Date (staff)	users.employee_id, users.department, users.designation, users.joining_date	Required for staff roles
Password, Confirm Password	users.password_hash	Password policy; both fields match; stored as a hash
(system) Account status	users.status	Active for students; Pending for recruiters and staff

6.2 Student profile and resume (S04, Tasks T05 - T08)

Field on screen	Table.column	Validation rule
Enrollment No. (read-only)	student_profiles.enrollment_no	Copied from registration; unique
Branch, Semester	student_profiles.branch, semester	Required; a change needs re-verification
CGPA	student_profiles.cgpa	Required; between 0 and 10
Backlogs	student_profiles.backlogs	Whole number, 0 or more
Skills	student_profiles.skills	Text, up to 255 characters
Address	student_profiles.address	Text, up to 255 characters
Phone	users.phone	Valid format, unique
Date of Birth	student_profiles.date_of_birth	Valid date in the past

Field on screen	Table.column	Validation rule
LinkedIn / GitHub (optional)	student_profiles.linkedin_url or github_url	Valid URL
Resume file	student_resumes.file_name, file_path, file_type, file_size_kb, is_current	PDF only, maximum 2 MB; one current resume
(system) Verification	student_profiles.verification_ status, verified_by, verified_at	Set by the Placement Officer
(system) Changes	student_edit_history.field_na me, old_value, new_value	Saved on every edit

6.3 Company profile (S09, Task T09)

Field on screen	Table.column	Validation rule
Company Name	companies.company_name	Required; duplicate warning with website
Industry	companies.industry	Required
Website	companies.website	Required; valid URL
Location / Address	companies.location	Required
HR Name, HR E-mail, HR Phone	companies.hr_name, hr_email, hr_phone	Required; valid e-mail and phone
Company Size (optional)	companies.company_size	Optional
Company Description	companies.description	Required
(system) Recruiter account	companies.user_id	One company per approved recruiter

6.4 Post and edit opportunity (S10, Tasks T10 and T11)

Field on screen	Table.column	Validation rule
Title	opportunities.title	Required, up to 150 characters
Type	opportunities.type	Internship or Placement
Location	opportunities.location	Required
Description	opportunities.description	Required
Minimum CGPA	opportunities.min_cgpa	Between 0 and 10
Minimum Semester	opportunities.min_semester	Whole number
Maximum Backlogs	opportunities.max_backlogs	Whole number, 0 or more
Eligible Branches	opportunities.eligible_branch es	At least one branch

Field on screen	Table.column	Validation rule
Stipend / Package (Rs.)	opportunities.compensation	Number, 0 or more
Vacancies	opportunities.vacancies	Whole number, 1 or more
Application Deadline	opportunities.application_deadline	Required; a future date
Reason (edit mode)	opportunity_edit_history.reason	Required when editing
(system) Poster and company	opportunities.posted_by, company_id; status = Open	Set by the backend

6.5 Interview and offer (S13, Tasks T17 and T19)

Field on screen	Table.column	Validation rule
Application (shortlisted only)	interviews.application_id	Application status must be Shortlisted
Round	interviews.round_number	Whole number, 1 or more
Date and Time	interviews.interview_datetime	Required; not in the past
Mode	interviews.mode	Online or Campus
Venue or meeting link	interviews.venue_or_link	Required
Application (selected only)	offers.application_id	Application status must be Selected; one offer per application
Job Title	offers.job_title	Required
Package (Rs.)	offers.package_amount	Required; number, 0 or more
Joining Date	offers.joining_date	Valid future date
Offer Valid Till	offers.offer_validity_date	Required; future date
Remarks	offers.remarks	Optional, up to 255 characters
(system) Offer status	offers.status	Pending at release; Accepted or Rejected after the student responds

6.6 Report generation (S16, Task T24)

Field on screen	Table.column	Validation rule
Report Type	report_history.report_type	Required
Start Date, End Date	report_history.start_date, end_date	End date is not before start date

Field on screen	Table.column	Validation rule
Scope	report_history.scope	All, a branch or a company (own department for Faculty Coordinators)
Export format	report_history.export_format	PDF or Excel
(system) Generated by and time	report_history.generated_by, generated_at	Saved for every report

7. Messages, Validation and Empty States

The messages below are written once and reused on all screens. They follow the acceptance criteria and business rules of Industrial Assignments 2 to 4.

Situation	Message text	Treatment
Duplicate e-mail, phone or enrollment number (T01)	This e-mail is already registered. Please login or use another e-mail.	Red text below the field
Mandatory field empty	{Field name} is required.	Red border and text
Weak password (T01)	Password must have at least 8 characters with upper-case, lower-case, a digit and a symbol.	Red text below the field
Wrong credentials (T02)	Invalid credentials. Please check your e-mail or phone and password.	Error alert above the form
Too many failed attempts (T02)	Your account is temporarily locked because of repeated failed attempts. Please try again later.	Error alert
Account pending (T02)	Your account is pending approval. You can use the portal after it is approved.	Warning alert
Account rejected (T02, T04)	Your registration was rejected. Reason: {reason}.	Error alert
Account deactivated (T02)	Your account has been deactivated. Please contact the Administrator.	Error alert
CGPA out of range (T05)	CGPA must be between 0 and 10.	Red text below the field
Wrong resume file (T08)	Only PDF files up to 2 MB are allowed.	Red text in the drop zone
Past deadline when posting (T10)	Application deadline must be a future date.	Red text below the field
Delete not allowed (T12)	This opportunity has selected applicants. You can close it, but you cannot delete it.	Warning alert in the dialog
Ineligible student (T13)	You cannot apply: minimum CGPA required is {x} (your CGPA is {y}).	Red cross in the eligibility panel

Situation	Message text	Treatment
Duplicate application (T13)	You have already applied for this opportunity.	Error alert; Apply disabled
Deadline over or closed (T13)	The application deadline for this opportunity is over.	Disabled button with message
Placement offer accepted (BR-09)	You have accepted a placement offer. You cannot apply for another placement without an exception from the Placement Officer.	Warning alert
Withdraw (T16)	Withdraw this application? You can apply again only before the deadline.	Confirmation dialog
Interview rule (T17)	An interview can be scheduled only for a shortlisted application.	Error alert
Offer rule (T19)	An offer can be released only for a selected application.	Error alert
Report dates (T24)	End date must be after the start date.	Red text below the field
No data for report (T24)	No records found for the selected period. No report was created.	Information alert
No permission	You do not have permission to open this page.	Redirect to login or dashboard
Success	{Action} completed successfully.	Green alert for 4 seconds

Empty states. Lists with no records show a short sentence and a next action instead of an empty table, for example "You have not applied to any opportunity yet. Browse opportunities" on My Applications, and "No new applicants" on the recruiter dashboard.

8. Interactive Prototype

8.1 Prototype settings

Setting	Value
Device and starting frame	Desktop 1280 x 800; starting frame S01 Login
Default interaction	On click, Navigate to; instant for menu items, 200 ms dissolve for login and logout, 250 ms move in for detail pages
Overlays	Close, Withdraw and Delete dialogs open as overlays with a dark scrim; clicking outside closes them
Variants	Status badges, Accept and Reject results, eligibility pass and fail, and role variants of the dashboard and registration form use "Change to" interactions

Setting	Value
Sample accounts	One account for each role so that the flows can be tested without typing data

8.2 Prototype flows

The arrows show the screens that are connected in each flow. The text above an arrow is the user action that triggers it.

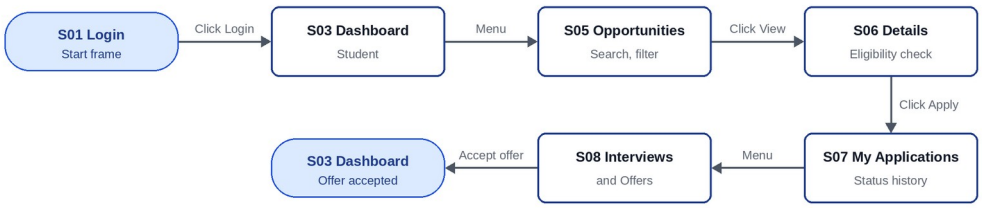

Figure 19: Prototype flow of the Student

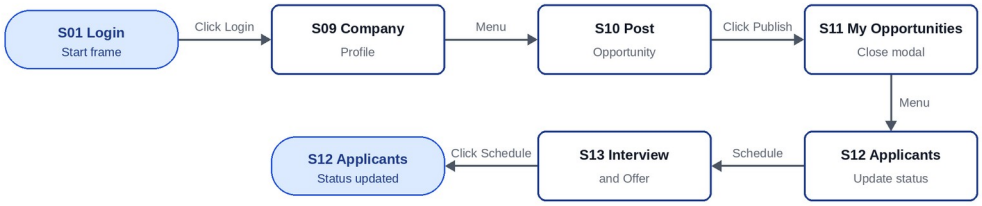

Figure 20: Prototype flow of the Company Recruiter

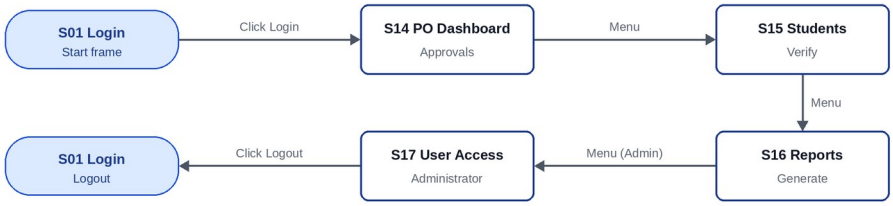

Figure 21: Prototype flow of the Placement Officer and the Administrator

8.3 Interaction table

Trigger	Element (screen)	Action	Destination and animation
Click	Login button (S01)	Navigate to	S03 for Student; S09 or dashboard for Recruiter; S14 for staff; dissolve 200 ms
Click	Create an account (S01)	Navigate to	S02; move in from right, 250 ms
Click	Role segments (S02)	Change to	Role variant of the form (fields change)
Click	Register button (S02)	Navigate to	S01 with a success alert

Trigger	Element (screen)	Action	Destination and animation
Click	Sidebar items (S03 - S17)	Navigate to	Matching screen; instant
Click	Eligible only toggle (S05)	Change to	Filtered list variant
Click	View on a table row (S05)	Navigate to	S06; move in, 250 ms
Click	Apply Now (S06)	Navigate to	S07 with the new Applied row and success alert
Click	Withdraw (S07)	Open overlay	Confirmation dialog; Confirm changes badge to Withdrawn
Click	Accept offer, Reject offer (S08)	Change to	Accepted or Rejected variant of the offer card
Click	Publish (S10)	Navigate to	S11 with the new Open row
Click	Close or Delete (S11)	Open overlay	Dialog; Confirm changes the badge to Closed or Deleted
Click	Shortlist or Reject (S12)	Change to	Row with the new status badge
Click	Schedule interview, Release offer (S12)	Navigate to	S13; move in, 250 ms
Click	Approve or Reject (S14, S17)	Change to	Row with Active or Rejected status
Click	Generate report (S16)	Open overlay	Success message and a new row in Report history
Click	Logout (top bar)	Navigate to	S01; dissolve 200 ms

8.4 Prototype test scenarios

ID	Scenario	Steps	Expected result
PT-01	Student applies	Login, open Opportunities, View, Apply Now, open My Applications	New row with the Applied badge
PT-02	Ineligible student	Open the S06 variant with CGPA 6.1 against a minimum of 6.5	Red cross with reason; Apply Now is disabled
PT-03	Recruiter posts and closes	Login, create company profile, Publish an opportunity, Close it	Row shows the Closed badge
PT-04	Interview and offer	Open Applicants, Schedule interview, then Release offer for a selected student	Status changes; offer appears as Pending
PT-05	Student responds to offer	Open Interviews and Offers, click Accept offer	Offer card shows Accepted
PT-06	Placement Officer	Approve a recruiter on the dashboard, generate a Branch-wise report	Approved row; report listed in history

ID	Scenario	Steps	Expected result
PT-07	Administrator	Deactivate a user in User Access and confirm	Status badge shows Deactivated
PT-08	Mobile	Open S18, switch to Jobs, tap View and Apply	Same flow works with the tab bar

9. Accessibility and Usability Checks

Check	How the design meets it	Result
Text contrast	Body text #111827 on white	17.7 : 1 (Pass)
Button contrast	White text on Primary #1D4ED8	6.7 : 1 (Pass)
Muted text contrast	Muted #5F6673 on page background #F3F4F6	5.2 : 1 (Pass)
Badge contrast	Warning text #B45309 on tint #FEF3C7 (lowest of the five badge pairs)	4.5 : 1 (Pass)
Meaning without colour	Every status badge, error and eligibility result carries text	Applied
Form labels	All fields have visible labels; required fields marked with *	Applied
Touch size	Mobile buttons and tabs at least 44 px high	Applied
Role privacy	Contact details masked for Faculty Coordinators; recruiters see only own applicants	Applied
Confirmation	Close, delete, deactivate and withdraw open a dialog	Applied

Review plan. The prototype is walked through with the faculty guide and with classmates acting as a student and a recruiter, using scenarios PT-01 to PT-08. Problems found are corrected in the Figma file and noted in the change log on the Cover page.

10. Task Traceability and Hand-off

The table maps all 28 tasks to the screens of this assignment. The last column is a suggested REST endpoint for the Spring Boot backend; the final API design is made in Industrial Assignments 10 and 11 and tested in Industrial Assignment 12.

Task	Task name	Screens	Suggested endpoint
T01	Register User	S02	POST /api/auth/register
T02	User Login	S01	POST /api/auth/login
T03	User Logout	Top bar of S03 - S17	POST /api/auth/logout

Task	Task name	Screens	Suggested endpoint
T04	Manage User Access	S14, S17	PUT /api/users/{id}/access
T05	Create Student Profile	S04	POST /api/students
T06	View Student Profile	S04, S12, S15	GET /api/students/{id}
T07	Edit Student Profile	S04, S15	PUT /api/students/{id}
T08	Upload and Manage Resume	S04	POST /api/students/{id}/resume
T09	Create Company Profile	S09	POST /api/companies
T10	Post Opportunity	S10	POST /api/opportunities
T11	Edit Opportunity	S10, S11	PUT /api/opportunities/{id}
T12	Close or Delete Opportunity	S11	PUT /api/opportunities/{id}/close; DELETE /api/opportunities/{id}
T13	Apply for Opportunity	S06	POST /api/applications
T14	View Application Details	S07, S12	GET /api/applications/{id}
T15	Update Application Status	S12	PUT /api/applications/{id}/status
T16	Withdraw Application	S07	PUT /api/applications/{id}/withdraw
T17	Schedule Interview	S13	POST /api/interviews
T18	View Interview Schedule	S08	GET /api/interviews
T19	Release Offer	S13	POST /api/offers
T20	Respond to Offer	S08	PUT /api/offers/{id}/response
T21	View Dashboard	S03, S14	GET /api/dashboard
T22	View Opportunity Summary	S14, S16	GET /api/summary/opportunities
T23	View Placement Summary	S14, S16	GET /api/summary/placements
T24	Generate Reports	S16	POST /api/reports
T25	Search Opportunities	S05	GET /api/opportunities?keyword=
T26	Filter Opportunities	S05	GET /api/opportunities?type=&status=
T27	Search Student Records	S15	GET /api/students?name=&branch=
T28	Filter Applications	S07, S12	GET /api/applications? status=&branch=

Hand-off to development. For the next assignments the developers use: (1) the Figma frames and components for the React screens, (2) the field-to-column tables of Section 6 for the JPA entities and validation, (3) the messages of Section 7 for the error responses, and (4) the prototype scenarios as the basis for Postman and UI test cases.

11. Conclusion

This assignment turned the wireframes of Industrial Assignment 7 into 18 high-fidelity screens built from one design system. The fields of every form were linked to the database columns, the validation and business-rule messages were defined, and the prototype connected the screens into the main flows of each role. All 28 tasks are covered by at least one screen. The Figma file now serves as the reference for running the full stack project (Industrial Assignment 9) and for the Spring Boot development and Postman testing that follow.
